$CrInGeCrInGeProduction.Supercringeintroductionhere$:

Let's calculate smth with a given function: f(x, y) = $\sin x \cdot y^{2.000}$
Firstly, let's insert all constants and simplify this expression: f(x, y) = $\sin x \cdot y^{2.000}$
BRITISH SCIENTISTS WERE SHOCKED, WHEN THEY COUNT IT!!!
In the point (x = 3.000, y = 2.000) it's value = 0.564
Personally, I've always thought about first derivation of something like that function... Haven't you?
But now, by using informatics and math skills I feel that I'm prepared enough to calculate it!
1 step. finding a derivation of:
y
While preparing for exams, I learned a lot of new things, for example:
$(y)' =$
$=1.000$
2 step. finding a derivation of:
$y^{2.000}$
It's really easy to find:
$(y^{2.000})' =$
$=2.000 \cdot y$
3 step. finding a derivation of:
x
My roommate mumbled it in his sleep all night:
$(x)' =$
$=1.000$
4 step. finding a derivation of:
$\sin x$
Sounds logical that it is the same as:
$(\sin x)' =$
$=\cos x$
5 step. finding a derivation of:
$\sin x \cdot y^{2.000}$
For centuries, people have hunted for the secret knowledge that:
$(\sin x \cdot y^{2.000})' =$
$=\cos x \cdot y^{2.000} + 2.000 \cdot y \cdot \sin x$
Congratulations! The first derivation of the expression is:
$\cos x \cdot y^{2.000} + 2.000 \cdot y \cdot \sin x$In the point (x = 3.000, y = 2.000) it's value = -3.395
Let's calculate the 4 derivation of the expression:
Calculating the 1 derivation of the expression:
1 step. finding a derivation of:
y
Sounds logical that it is the same as:
$(y)' =$
$=1.000$
2 step. finding a derivation of:
$y^{2.000}$
It's really easy to find:
$(y^{2.000})' =$
$=2.000 \cdot y$
3 step. finding a derivation of:
x
My roommate mumbled it in his sleep all night:
$(x)' =$
$=1.000$
4 step. finding a derivation of:
$\sin x$
What if it equals:
$(\sin x)' =$
$=\cos x$
5 step. finding a derivation of:
$\sin x \cdot y^{2.000}$
It's really easy to find:
$(\sin x \cdot y^{2.000})' =$
$=\cos x \cdot y^{2.000} + 2.000 \cdot y \cdot \sin x$
Calculating the 2 derivation of the expression:
1 step. finding a derivation of:
x
Even my two-aged sister knows that it equals:
$(x)' =$
$=1.000$
2 step. finding a derivation of:
$\sin x$
When I was child, my father always told me: "Remember, son:
$(\sin x)' =$
$=\cos x$
3 step. finding a derivation of:
y
I spend the hole of my life to find the answer and finally it's:
$(y)' =$
$=1.000$

4 step. finding a derivation of:
2.000
Man... Just look:
$(2.000)' =$
$=0.000$
5 step. finding a derivation of:
$2.000 \cdot y$
For centuries, people have hunted for the secret knowledge that:
$(2.000 \cdot y)' =$
$=2.000$
6 step. finding a derivation of:
$2.000 \cdot y \cdot \sin x$
It's really easy to find:
$(2.000 \cdot y \cdot \sin x)' =$
$=2.000 \cdot \sin x + \cos x \cdot 2.000 \cdot y$
7 step. finding a derivation of:
y
It's simple as fuck:
$(y)' =$
$=1.000$
8 step. finding a derivation of:
$y^{2.000}$
thanks to the results of my colleagues' scientific work, I know that it equals:
$(y^{2.000})' =$
$=2.000 \cdot y$
9 step. finding a derivation of:
x
When I was child, my father always told me: "Remember, son:
$(x)' =$
$=1.000$
10 step. finding a derivation of:
$\cos x$
It's really easy to find:
$(\cos x)' =$
$=(-1.000) \cdot \sin x$
11 step. finding a derivation of:
$\cos x \cdot y^{2.000}$
I was asked not to tell anyone that:
$(\cos x \cdot y^{2.000})' =$
$=(-1.000) \cdot \sin x \cdot y^{2.000} + 2.000 \cdot y \cdot \cos x$
12 step. finding a derivation of:
$\cos x \cdot y^{2.000} + 2.000 \cdot y \cdot \sin x$
For centuries, people have hunted for the secret knowledge that:
$(\cos x \cdot y^{2.000} + 2.000 \cdot y \cdot \sin x)' =$
$=(-1.000) \cdot \sin x \cdot y^{2.000} + 2.000 \cdot y \cdot \cos x + 2.000 \cdot \sin x + \cos x \cdot 2.000 \cdot y$
Calculating the 3 derivation of the expression:
1 step. finding a derivation of:
y
My roommate mumbled it in his sleep all night:
$(y)' =$
$=1.000$
2 step. finding a derivation of:
2.000
What if it equals:
$(2.000)' =$
$=0.000$
3 step. finding a derivation of:
$2.000 \cdot y$
Even my two-aged sister knows that it equals:
$(2.000 \cdot y)' =$
$=2.000$
4 step. finding a derivation of:
x
I spend the hole of my life to find the answer and finally it's:
$(x)' =$
$=1.000$
5 step. finding a derivation of:
$\cos x$
Even my two-aged sister knows that it equals:
$(\cos x)' =$
$=(-1.000) \cdot \sin x$
6 step. finding a derivation of:
$\cos x \cdot 2.000 \cdot y$
While preparing for exams, I learned a lot of new things, for example:
$(\cos x \cdot 2.000 \cdot y)' =$
$=(-1.000) \cdot \sin x \cdot 2.000 \cdot y + 2.000 \cdot \cos x$
7 step. finding a derivation of:
x

When I was child, my father always told me: "Remember, son:
$(x)' =$
$=1.000$
8 step. finding a derivation of:
$\sin x$
Sounds logical that it is the same as:
$(\sin x)' =$
$=\cos x$
9 step. finding a derivation of:
2.000
A true prince must know that it equals:
$(2.000)' =$
$=0.000$
10 step. finding a derivation of:
$2.000 \cdot \sin x$
My roommate mumbled it in his sleep all night:
$(2.000 \cdot \sin x)' =$
$=2.000 \cdot \cos x$
11 step. finding a derivation of:
$2.000 \cdot \sin x + \cos x \cdot 2.000 \cdot y$
My roommate mumbled it in his sleep all night:
$(2.000 \cdot \sin x + \cos x \cdot 2.000 \cdot y)' =$
$=2.000 \cdot \cos x + (-1.000) \cdot \sin x \cdot 2.000 \cdot y + 2.000 \cdot \cos x$
12 step. finding a derivation of:
x
If someone asked me that in the middle of the night, I wouldn't hesitate to say:
$(x)' =$
$=1.000$
13 step. finding a derivation of:
$\cos x$
A true prince must know that it equals:
$(\cos x)' =$
$=(-1.000) \cdot \sin x$
14 step. finding a derivation of:
y
My roommate mumbled it in his sleep all night:
$(y)' =$
$=1.000$
15 step. finding a derivation of:
2.000
While preparing for exams, I learned a lot of new things, for example:
$(2.000)' =$
$=0.000$
16 step. finding a derivation of:
$2.000 \cdot y$
It's really easy to find:
$(2.000 \cdot y)' =$
$=2.000$
17 step. finding a derivation of:
$2.000 \cdot y \cdot \cos x$
It's really easy to find:
$(2.000 \cdot y \cdot \cos x)' =$
$=2.000 \cdot \cos x + (-1.000) \cdot \sin x \cdot 2.000 \cdot y$
18 step. finding a derivation of:
y
When I was child, my father always told me: "Remember, son:
$(y)' =$
$=1.000$
19 step. finding a derivation of:
$y^{2.000}$
What if it equals:
$(y^{2.000})' =$
$=2.000 \cdot y$
20 step. finding a derivation of:
x
If someone asked me that in the middle of the night, I wouldn't hesitate to say:
$(x)' =$
$=1.000$
21 step. finding a derivation of:
$\sin x$
thanks to the results of my colleagues' scientific work, I know that it equals:
$(\sin x)' =$
$=\cos x$
22 step. finding a derivation of:
(-1.000)
A true prince must know that it equals:
$((-1.000))' =$
$=0.000$

23 step. finding a derivation of:
$(-1.000) \cdot \sin x$
A true prince must know that it equals:
$((-1.000) \cdot \sin x)' =$
$=(-1.000) \cdot \cos x$
24 step. finding a derivation of:
$(-1.000) \cdot \sin x \cdot y^{2.000}$
When I was child, my father always told me: "Remember, son:
$((-1.000) \cdot \sin x \cdot y^{2.000})' =$
$=(-1.000) \cdot \cos x \cdot y^{2.000} + 2.000 \cdot y \cdot (-1.000) \cdot \sin x$
25 step. finding a derivation of:
$(-1.000) \cdot \sin x \cdot y^{2.000} + 2.000 \cdot y \cdot \cos x$
For centuries, people have hunted for the secret knowledge that:
$((-1.000) \cdot \sin x \cdot y^{2.000} + 2.000 \cdot y \cdot \cos x)' =$
$=(-1.000) \cdot \cos x \cdot y^{2.000} + 2.000 \cdot y \cdot (-1.000) \cdot \sin x + 2.000 \cdot \cos x + (-1.000) \cdot \sin x \cdot 2.000 \cdot y$
26 step. finding a derivation of:
$(-1.000) \cdot \sin x \cdot y^{2.000} + 2.000 \cdot y \cdot \cos x + 2.000 \cdot \sin x + \cos x \cdot 2.000 \cdot y$
A true prince must know that it equals:
$((-1.000) \cdot \sin x \cdot y^{2.000} + 2.000 \cdot y \cdot \cos x + 2.000 \cdot \sin x + \cos x \cdot 2.000 \cdot y)' =$
$=(-1.000) \cdot \cos x \cdot y^{2.000} + 2.000 \cdot y \cdot (-1.000) \cdot \sin x + 2.000 \cdot \cos x + (-1.000) \cdot \sin x \cdot 2.000 \cdot y + 2.000 \cdot \cos x + (-1.000) \cdot \sin x \cdot 2.000 \cdot y + 2.000 \cdot \cos x$
Calculating the 4 derivation of the expression:
1 step. finding a derivation of:
x
I spend the hole of my life to find the answer and finally it's:
$(x)' =$
$=1.000$
2 step. finding a derivation of:
$\cos x$
It's simple as fuck:
$(\cos x)' =$
$=(-1.000) \cdot \sin x$
3 step. finding a derivation of:
2.000
For centuries, people have hunted for the secret knowledge that:
$(2.000)' =$
$=0.000$
4 step. finding a derivation of:
$2.000 \cdot \cos x$
It's really easy to find:
$(2.000 \cdot \cos x)' =$
$=2.000 \cdot (-1.000) \cdot \sin x$
5 step. finding a derivation of:
y
It's really easy to find:
$(y)' =$
$=1.000$
6 step. finding a derivation of:
2.000
I spend the hole of my life to find the answer and finally it's:
$(2.000)' =$
$=0.000$
7 step. finding a derivation of:
$2.000 \cdot y$
I was asked not to tell anyone that:
$(2.000 \cdot y)' =$
$=2.000$
8 step. finding a derivation of:
x
If someone asked me that in the middle of the night, I wouldn't hesitate to say:
$(x)' =$
$=1.000$
9 step. finding a derivation of:
$\sin x$
Even my two-aged sister knows that it equals:
$(\sin x)' =$
$=\cos x$
10 step. finding a derivation of:
(-1.000)
I spend the hole of my life to find the answer and finally it's:
$((-1.000))' =$
$=0.000$
11 step. finding a derivation of:
$(-1.000) \cdot \sin x$
It's really easy to find:
$((-1.000) \cdot \sin x)' =$
$=(-1.000) \cdot \cos x$
12 step. finding a derivation of:
$(-1.000) \cdot \sin x \cdot 2.000 \cdot y$

It's really easy to find:
$((-1.000) \cdot \sin x \cdot 2.000 \cdot y)' =$
$=(-1.000) \cdot \cos x \cdot 2.000 \cdot y + 2.000 \cdot (-1.000) \cdot \sin x$
13 step. finding a derivation of:
$(-1.000) \cdot \sin x \cdot 2.000 \cdot y + 2.000 \cdot \cos x$
It's simple as fuck:
$((-1.000) \cdot \sin x \cdot 2.000 \cdot y + 2.000 \cdot \cos x)' =$
$=(-1.000) \cdot \cos x \cdot 2.000 \cdot y + 2.000 \cdot (-1.000) \cdot \sin x + 2.000 \cdot (-1.000) \cdot \sin x$
14 step. finding a derivation of:
x
It's simple as fuck:
$(x)' =$
$=1.000$
15 step. finding a derivation of:
$\cos x$
A true prince must know that it equals:
$(\cos x)' =$
$=(-1.000) \cdot \sin x$
16 step. finding a derivation of:
2.000
My roommate mumbled it in his sleep all night:
$(2.000)' =$
$=0.000$
17 step. finding a derivation of:
$2.000 \cdot \cos x$
I was asked not to tell anyone that:
$(2.000 \cdot \cos x)' =$
$=2.000 \cdot (-1.000) \cdot \sin x$
18 step. finding a derivation of:

I spend the hole of my life to find the answer and finally it's:
$(2.000 \cdot \cos x + (-1.000) \cdot \sin x \cdot 2.000 \cdot y + 2.000 \cdot \cos x)' =$
$=2.000 \cdot (-1.000) \cdot \sin x + (-1.000) \cdot \cos x \cdot 2.000 \cdot y + 2.000 \cdot (-1.000) \cdot \sin x + 2.000 \cdot (-1.000) \cdot \sin x$
19 step. finding a derivation of:
y
It's really easy to find:
$(y)' =$
$=1.000$
20 step. finding a derivation of:
2.000
What if it equals:
$(2.000)' =$
$=0.000$
21 step. finding a derivation of:
$2.000 \cdot y$
While preparing for exams, I learned a lot of new things, for example:
$(2.000 \cdot y)' =$
$=2.000$
22 step. finding a derivation of:
x
Even my two-aged sister knows that it equals:
$(x)' =$
$=1.000$
23 step. finding a derivation of:
$\sin x$
What if it equals:
$(\sin x)' =$
$=\cos x$
24 step. finding a derivation of:
(-1.000)
It's simple as fuck:
$((-1.000))' =$
$=0.000$
25 step. finding a derivation of:
$(-1.000) \cdot \sin x$
My roommate mumbled it in his sleep all night:
$((-1.000) \cdot \sin x)' =$
$=(-1.000) \cdot \cos x$
26 step. finding a derivation of:
$(-1.000) \cdot \sin x \cdot 2.000 \cdot y$
It's simple as fuck:
$((-1.000) \cdot \sin x \cdot 2.000 \cdot y)' =$
$=(-1.000) \cdot \cos x \cdot 2.000 \cdot y + 2.000 \cdot (-1.000) \cdot \sin x$
27 step. finding a derivation of:
x
A true prince must know that it equals:
$(x)' =$
$=1.000$

28 step. finding a derivation of:
$\cos x$
My roommate mumbled it in his sleep all night:
$(\cos x)' =$
$=(-1.000) \cdot \sin x$
29 step. finding a derivation of:
2.000
A true prince must know that it equals:
$(2.000)' =$
$=0.000$
30 step. finding a derivation of:
$2.000 \cdot \cos x$
A true prince must know that it equals:
$(2.000 \cdot \cos x)' =$
$=2.000 \cdot (-1.000) \cdot \sin x$
31 step. finding a derivation of:
$2.000 \cdot \cos x + (-1.000) \cdot \sin x \cdot 2.000 \cdot y$
If someone asked me that in the middle of the night, I wouldn't hesitate to say:
$(2.000 \cdot \cos x + (-1.000) \cdot \sin x \cdot 2.000 \cdot y)' =$
$=2.000 \cdot (-1.000) \cdot \sin x + (-1.000) \cdot \cos x \cdot 2.000 \cdot y + 2.000 \cdot (-1.000) \cdot \sin x$
32 step. finding a derivation of:
x
I spend the hole of my life to find the answer and finally it's:
$(x)' =$
$=1.000$
33 step. finding a derivation of:
$\sin x$
When I was child, my father always told me: "Remember, son:
$(\sin x)' =$
$=\cos x$
34 step. finding a derivation of:
(-1.000)
If someone asked me that in the middle of the night, I wouldn't hesitate to say:
$((-1.000))' =$
$=0.000$
35 step. finding a derivation of:
$(-1.000) \cdot \sin x$
thanks to the results of my colleagues' scientific work, I know that it equals:
$((-1.000) \cdot \sin x)' =$
$=(-1.000) \cdot \cos x$
36 step. finding a derivation of:
y
For centuries, people have hunted for the secret knowledge that:
$(y)' =$
$=1.000$
37 step. finding a derivation of:
2.000
For centuries, people have hunted for the secret knowledge that:
$(2.000)' =$
$=0.000$
38 step. finding a derivation of:
$2.000 \cdot y$
What if it equals:
$(2.000 \cdot y)' =$
$=2.000$
39 step. finding a derivation of:
$2.000 \cdot y \cdot (-1.000) \cdot \sin x$
If someone asked me that in the middle of the night, I wouldn't hesitate to say:
$(2.000 \cdot y \cdot (-1.000) \cdot \sin x)' =$
$=2.000 \cdot (-1.000) \cdot \sin x + (-1.000) \cdot \cos x \cdot 2.000 \cdot y$
40 step. finding a derivation of:
y
I was asked not to tell anyone that:
$(y)' =$
$=1.000$
41 step. finding a derivation of:
$y^{2.000}$
A true prince must know that it equals:
$(y^{2.000})' =$
$=2.000 \cdot y$
42 step. finding a derivation of:
x
Man... Just look:
$(x)' =$
$=1.000$
43 step. finding a derivation of:
$\cos x$
My roommate mumbled it in his sleep all night:

$(\cos x)' =$

$=(-1.000) \cdot \sin x$

44 step. finding a derivation of:

(-1.000)

It's simple as fuck:

$((-1.000))' =$

$=0.000$

45 step. finding a derivation of:

$(-1.000) \cdot \cos x$

I was asked not to tell anyone that:

$((-1.000) \cdot \cos x)' =$

$=(-1.000) \cdot (-1.000) \cdot \sin x$

46 step. finding a derivation of:

$(-1.000) \cdot \cos x \cdot y^{2.000}$

If someone asked me that in the middle of the night, I wouldn't hesitate to say:

$((-1.000) \cdot \cos x \cdot y^{2.000})' =$

$=(-1.000) \cdot (-1.000) \cdot \sin x \cdot y^{2.000} + 2.000 \cdot y \cdot (-1.000) \cdot \cos x$

47 step. finding a derivation of:

$(-1.000) \cdot \cos x \cdot y^{2.000} + 2.000 \cdot y \cdot (-1.000) \cdot \sin x$

Man... Just look:

$((-1.000) \cdot \cos x \cdot y^{2.000} + 2.000 \cdot y \cdot (-1.000) \cdot \sin x)' =$

$=(-1.000) \cdot (-1.000) \cdot \sin x \cdot y^{2.000} + 2.000 \cdot y \cdot (-1.000) \cdot \cos x + 2.000 \cdot (-1.000) \cdot \sin x + (-1.000) \cdot \cos x \cdot 2.000 \cdot y$

48 step. finding a derivation of:

$(-1.000) \cdot \cos x \cdot y^{2.000} + 2.000 \cdot y \cdot (-1.000) \cdot \sin x + 2.000 \cdot \cos x + (-1.000) \cdot \sin x \cdot 2.000 \cdot y$

When I was child, my father always told me: "Remember, son:

$((-1.000) \cdot \cos x \cdot y^{2.000} + 2.000 \cdot y \cdot (-1.000) \cdot \sin x + 2.000 \cdot \cos x + (-1.000) \cdot \sin x \cdot 2.000 \cdot y)' =$

$=(-1.000) \cdot (-1.000) \cdot \sin x \cdot y^{2.000} + 2.000 \cdot y \cdot (-1.000) \cdot \cos x + 2.000 \cdot (-1.000) \cdot \sin x + (-1.000) \cdot \cos x \cdot 2.000 \cdot y + 2.000 \cdot (-1.000) \cdot \sin x + (-1.000) \cdot \cos x \cdot 2.000 \cdot y + 2.000 \cdot (-1.000) \cdot \sin x$

49 step. finding a derivation of:

$(-1.000) \cdot \cos x \cdot y^{2.000} + 2.000 \cdot y \cdot (-1.000) \cdot \sin x + 2.000 \cdot \cos x + (-1.000) \cdot \sin x \cdot 2.000 \cdot y + 2.000 \cdot \cos x + (-1.000) \cdot \sin x \cdot 2.000 \cdot y + 2.000 \cdot \cos x$

It's really easy to find:

$((-1.000) \cdot \cos x \cdot y^{2.000} + 2.000 \cdot y \cdot (-1.000) \cdot \sin x + 2.000 \cdot \cos x + (-1.000) \cdot \sin x \cdot 2.000 \cdot y + 2.000 \cdot \cos x + (-1.000) \cdot \sin x \cdot 2.000 \cdot y + 2.000 \cdot \cos x)' =$

$=(-1.000) \cdot (-1.000) \cdot \sin x \cdot y^{2.000} + 2.000 \cdot y \cdot (-1.000) \cdot \cos x + 2.000 \cdot (-1.000) \cdot \sin x + (-1.000) \cdot \cos x \cdot 2.000 \cdot y + 2.000 \cdot (-1.000) \cdot \sin x + (-1.000) \cdot \cos x \cdot 2.000 \cdot y + 2.000 \cdot (-1.000) \cdot \sin x + 2.000 \cdot (-1.000) \cdot \sin x + (-1.000) \cdot \cos x \cdot 2.000 \cdot y + 2.000 \cdot (-1.000) \cdot \sin x + 2.000 \cdot (-1.000) \cdot \sin x$

Finally... The 4 derivation of the expression:

$(-1.000) \cdot (-1.000) \cdot \sin x \cdot y^{2.000} + 2.000 \cdot y \cdot (-1.000) \cdot \cos x + 2.000 \cdot (-1.000) \cdot \sin x + (-1.000) \cdot \cos x \cdot 2.000 \cdot y + 2.000 \cdot (-1.000) \cdot \sin x + (-1.000) \cdot \cos x \cdot 2.000 \cdot y + 2.000 \cdot (-1.000) \cdot \sin x + 2.000 \cdot (-1.000) \cdot \sin x + (-1.000) \cdot \cos x \cdot 2.000 \cdot y + 2.000 \cdot (-1.000) \cdot \sin x + 2.000 \cdot (-1.000) \cdot \sin x$

BRITISH SCIENTISTS WERE SHOCKED AGAIN, WHEN THEY COUNT THE 4 DERIVATION OF THIS EXPRESSION!!!

In the point (x = 3.000, y = 2.000) it's value = 14.711

Partial derivation of the expression on the variable x:

$\frac{\partial f}{\partial x} = 4.000 \cdot \cos x$

In the point (x = 3.000, y = 2.000) it's value = -3.959970 !!!

Partial derivation of the expression on the variable y:

$\frac{\partial f}{\partial y} = 0.141 \cdot 2.000 \cdot y$

In the point (x = 3.000, y = 2.000) it's value = 0.564480 !!!

Full derivation:

$\sqrt{(4.000 \cdot \cos x)^{2.000} + (0.141 \cdot 2.000 \cdot y)^{2.000}}$

In the point (x = 3.000, y = 2.000) it's value = 4.000 !!!

Let's consider the expression as a function of x variable: f(x) = $4.000 \cdot \sin x$

Maklorens formula for $x \to 3.000$: f(x) = $0.564 + (-3.960) \cdot (x - 3.000) + (-0.282) \cdot (x - 3.000)^{2.000} + 0.660 \cdot (x - 3.000)^{3.000} + 0.024 \cdot (x - 3.000)^{4.000} + (-0.033) \cdot (x - 3.000)^{5.000} + o((x - 3.000)^{5.000})$

Graph f(x):

Tangent equation in the point x = 0.000: f(x) = $4.000 \cdot x$
Normal equation in the point x = 0.000: f(x) = $(-0.250) \cdot (x - 0.000) + 0.000$
