CrInGeCrInGe Production. Super cringe introduction here:
Let's calculate smth with expression given:

$$x \cdot y \cdot z$$

Firstly, let's insert all constants and simplify it:

$$x \cdot y \cdot z$$

BRITISH SCIENTISTS WERE SHOCKED, WHEN THEY COUNT THIS EXPRESSION IN THE POINT (x = 1.000000, y = 2.000000, z = 3.000000)...
IT'S VALUE = 6.000000 !!!
Calculating the 1 derivation of the expression:
1 step: finding a derivation of function:

$$z$$

here it is:

$$1.000$$

2 step: finding a derivation of function:

$$y$$

here it is:

$$1.000$$

3 step: finding a derivation of function:

$$x$$

here it is:

$$1.000$$

4 step: finding a derivation of function:

$$x \cdot y$$

here it is:

$$y + x$$

5 step: finding a derivation of function:

$$x \cdot y \cdot z$$

here it is:

$$(y + x) \cdot z + x \cdot y$$

Calculating the 2 derivation of the expression:
1 step: finding a derivation of function:

$$y$$

$$1$$

here it is:

$$1.000$$

2 step: finding a derivation of function:

$$x$$

here it is:

$$1.000$$

3 step: finding a derivation of function:

$$x \cdot y$$

here it is:

$$y + x$$

4 step: finding a derivation of function:

$$z$$

here it is:

$$1.000$$

5 step: finding a derivation of function:

$$x$$

here it is:

$$1.000$$

6 step: finding a derivation of function:

$$y$$

here it is:

$$1.000$$

7 step: finding a derivation of function:

$$(y + x)$$

here it is:

$$2.000$$

8 step: finding a derivation of function:

$$(y + x) \cdot z$$

here it is:

$$2.000 \cdot z + (y + x)$$

9 step: finding a derivation of function:

$$(y + x) \cdot z + x \cdot y$$

here it is:

$$(2.000 \cdot z + (y + x)) + (y + x)$$

Calculating the 3 derivation of the expression:

1 step: finding a derivation of function:

$$x$$

here it is:

$$1.000$$

2 step: finding a derivation of function:

$$y$$

here it is:

$$1.000$$

3 step: finding a derivation of function:

$$(y + x)$$

here it is:

$$2.000$$

4 step: finding a derivation of function:

$$x$$

here it is:

$$1.000$$

5 step: finding a derivation of function:

$$y$$

here it is:

$$1.000$$

6 step: finding a derivation of function:

$$(y + x)$$

here it is:

$$2.000$$

7 step: finding a derivation of function:

$$z$$

here it is:

$$1.000$$

8 step: finding a derivation of function:

$$2.000$$

here it is:

$$0.000$$

9 step: finding a derivation of function:

$$2.000 \cdot z$$

here it is:

$$2.000$$

10 step: finding a derivation of function:

$$(2.000 \cdot z + (y + x))$$

here it is:

$$4.000$$

11 step: finding a derivation of function:

$$(2.000 \cdot z + (y + x)) + (y + x)$$

here it is:

$$6.000$$

Calculating the 4 derivation of the expression:
1 step: finding a derivation of function:

$$6.000$$

here it is:

$$0.000$$

Finally... The 4 derivation of the expression:

$$0.000$$

BRITISH SCIENTISTS WERE SHOCKED, WHEN THEY COUNT THE 4 DERIVATION OF THIS EXPRESSION IN THE POINT (x = 1.000000, y = 2.000000, z = 3.000000)...
IT'S VALUE = 0.000000 !!!
