CrInGeCrInGe Production. Super cringe introduction here:
Let's calculate smth with expression given:

$$x + y$$

Firstly, let's insert all constants and simplify it:

$$x + y$$

BRITISH SCIENTISTS WERE SHOCKED, WHEN THEY COUNT THIS EXPRESSION IN THE POINT (x = 2.000000, y = 9.000000)IT'S VALUE = 11.000000 !!!

1 step: finding a derivation of function:

$$y$$

here it is:

$$1.000$$

2 step: finding a derivation of function:

$$x$$

here it is:

$$1.000$$

3 step: finding a derivation of function:

$$x + y$$

here it is:

$$2.000$$

Congratulations! The first derivation of the expression is:

$$2.000$$

IN THE POINT (x = 2.000000, y = 9.000000)IT'S VALUE = 2.000000 !!!

Let's calculate the 2 derivation of the expression:
Calculating the 1 derivation of the expression:
1 step: finding a derivation of function:

$$y$$

here it is:

$$1.000$$

2 step: finding a derivation of function:

$$x$$

here it is:

$$1.000$$

3 step: finding a derivation of function:

$$x + y$$

here it is:

$$2.000$$

Calculating the 2 derivation of the expression:

1 step: finding a derivation of function:

$$2.000$$

here it is:

$$0.000$$

Finally... The 2 derivation of the expression:

$$0.000$$

BRITISH SCIENTISTS WERE SHOCKED, WHEN THEY COUNT THE 2 DERIVATION OF THIS EXPRESSION!!! IN THE POINT (x = 2.000000, y = 9.000000)IT'S VALUE = 0.000000 !!!

Partial derivation of the expression on the variable 'x':

$$1.000$$

IN THE POINT (x = 2.000000, y = 9.000000) IT'S VALUE = 1.000000 !!!

Partial derivation of the expression on the variable 'y':

$$1.000$$

IN THE POINT (x = 2.000000, y = 9.000000) IT'S VALUE = 1.000000 !!!

Full derivation:

$$1.414$$

IN THE POINT (x = 2.000000, y = 9.000000)IT'S VALUE = 1.414214 !!!

Maklorens formula for x near to 2.000000:

$$11.000 + x - 2.000$$

And remainig member is o maloe from:

$$(x - 2.000)^{3.000}$$
