CrInGeCrInGe Production. Super cringe introduction here:
Let's calculate smth with expression given: f(DimasIq) =

$$DimasIq$$

Firstly, let's insert all constants and simplify it:

$$DimasIq$$

BRITISH SCIENTISTS WERE SHOCKED, WHEN THEY COUNT IT!!! IN THE POINT (DimasIq = 0.000)IT'S VALUE = 0.000 !!!
1 step: finding a derivation of function:

$$DimasIq$$

here it is:

1.000

Congratulations! The first derivation of the expression is:

1.000

IN THE POINT (DimasIq = 0.000)IT'S VALUE = 1.000 !!!
Let's calculate the 2 derivation of the expression:
Calculating the 1 derivation of the expression:
1 step: finding a derivation of function:

$$DimasIq$$

here it is:

1.000

Calculating the 2 derivation of the expression:
1 step: finding a derivation of function:

1.000

here it is:

0.000

Finally... The 2 derivation of the expression:

0.000

BRITISH SCIENTISTS WERE SHOCKED, WHEN THEY COUNT THE 2 DERIVATION OF THIS EXPRESSION!!! IN THE POINT (DimasIq = 0.000)IT'S VALUE = 0.000 !!!
Partial derivation of the expression on the variable 'DimasIq':

1.000

IN THE POINT (DimasIq = 0.000) IT'S VALUE = 1.000000 !!!
Full derivation:

$$1.000$$

IN THE POINT (DimasIq = 0.000)IT'S VALUE = 1.000 !!!
Let's consider the expression as a function of DimasIq variable: f(DimasIq) =

$$DimasIq$$

Maklorens formula for DimasIq near to 0.000000:

$$DimasIq$$

And remainig member is o maloe from:

$$DimasIq^{3.000}$$

Graph f(DimasIq):
Tangent equation in point 1.000: f(DimasIq) =

$$DimasIq - 1.000 + 1.000$$

Normal equation in point 1.000: f(DimasIq) =

$$(-1.000) \cdot (DimasIq - 1.000) + 1.000$$
