CrInGeCrInGe Production. Super cringe introduction here:
Let's calculate smth with expression given:

$$\cos x$$

Firstly, let's insert all constants and simplify it:

$$\cos x$$

BRITISH SCIENTISTS WERE SHOCKED, WHEN THEY COUNT THIS EXPRESSION IN THE POINT (x = 1.000000)...
IT'S VALUE = 0.540302 !!!
Calculating the 1 derivation of the expression:
1 step: finding a derivation of function:

$$x$$

here it is:

$$1.000$$

2 step: finding a derivation of function:

$$\cos x$$

here it is:

$$(-1.000) \cdot \sin x$$

Calculating the 2 derivation of the expression:
1 step: finding a derivation of function:

$$x$$

here it is:

$$1.000$$

2 step: finding a derivation of function:

$$\sin x$$

here it is:

$$\cos x$$

3 step: finding a derivation of function:

$$(-1.000)$$

here it is:

$$0.000$$

4 step: finding a derivation of function:

$$(-1.000) \cdot \sin x$$

here it is:

$$(-1.000) \cdot \cos x$$

Finally... The 2 derivation of the expression:

$$(-1.000) \cdot \cos x$$

BRITISH SCIENTISTS WERE SHOCKED, WHEN THEY COUNT THE 2 DERIVATION OF THIS EXPRESSION IN THE POINT (x = 1.000000)...

IT'S VALUE = -0.540302 !!!

Partial derivation of the expression on the variable 'x':

$$(-1.000) \cdot \sin x$$

IN THE POINT (x = 1.000000) IT'S VALUE = -0.841471 !!!

Maklorens formula:

$$0.540 + (-0.841) \cdot (x - 1.000) + (-0.270) \cdot (x - 1.000)^{2.000} + 0.140 \cdot (x - 1.000)^{3.000}$$

And remainig member is o maloe from:

$$(x - 1.000)^{3.000}$$
