CrInGeCrInGe Production. Super cringe introduction here:
Let's calculate smth with expression given:

$$\sin x$$

Firstly, let's insert all constants and simplify it:

$$\sin x$$

BRITISH SCIENTISTS WERE SHOCKED, WHEN THEY COUNT THIS EXPRESSION IN THE POINT (x = 0.000000)...
IT'S VALUE = 0.000000 !!!
Calculating the 1 derivation of the expression:
1 step: finding a derivation of function:

$$x$$

here it is:

$$1.000$$

2 step: finding a derivation of function:

$$\sin x$$

here it is:

$$\cos x$$

Calculating the 2 derivation of the expression:
1 step: finding a derivation of function:

$$x$$

here it is:

$$1.000$$

2 step: finding a derivation of function:

$$\cos x$$

here it is:

$$(-1.000) \cdot \sin x$$

Calculating the 3 derivation of the expression:
1 step: finding a derivation of function:

$$x$$

here it is:

$$1.000$$

2 step: finding a derivation of function:

$$\sin x$$

here it is:

$$\cos x$$

3 step: finding a derivation of function:

$$(-1.000)$$

here it is:

$$0.000$$

4 step: finding a derivation of function:

$$(-1.000) \cdot \sin x$$

here it is:

$$(-1.000) \cdot \cos x$$

Calculating the 4 derivation of the expression:

1 step: finding a derivation of function:

$$x$$

here it is:

$$1.000$$

2 step: finding a derivation of function:

$$\cos x$$

here it is:

$$(-1.000) \cdot \sin x$$

3 step: finding a derivation of function:

$$(-1.000)$$

here it is:

$$0.000$$

4 step: finding a derivation of function:

$$(-1.000) \cdot \cos x$$

here it is:

$$(-1.000) \cdot (-1.000) \cdot \sin x$$

Finally... The 4 derivation of the expression:

$$(-1.000) \cdot (-1.000) \cdot \sin x$$

BRITISH SCIENTISTS WERE SHOCKED, WHEN THEY COUNT THE 4 DERIVATION OF THIS EXPRESSION IN THE POINT (x = 0.000000)...

IT'S VALUE = 0.000000 !!!

Partial derivation of the expression on the variable 'x':

$$\cos x$$

IN THE POINT (x = 0.000000) IT'S VALUE = 1.000000 !!!
Maklorens formula:

$$(((0.000 + x^{0.000}) + x^{1.000}) + x^{2.000}) + x^{3.000}$$
