CrInGeCrInGe Production. Super cringe introduction here:
Let's calculate smth with expression given:

$$x \cdot x$$

Firstly, let's insert all constants and simplify it:

$$x \cdot x$$

BRITISH SCIENTISTS WERE SHOCKED, WHEN THEY COUNT THIS EXPRESSION IN THE POINT (x = 1.000000)...
IT'S VALUE = 1.000000 !!!
Calculating the 1 derivation of the expression:
1 step: finding a derivation of function:

$$x$$

here it is:

$$1.000$$

2 step: finding a derivation of function:

$$x$$

here it is:

$$1.000$$

3 step: finding a derivation of function:

$$x \cdot x$$

here it is:

$$x + x$$

Calculating the 2 derivation of the expression:
1 step: finding a derivation of function:

$$x$$

here it is:

$$1.000$$

2 step: finding a derivation of function:

$$x$$

here it is:

$$1.000$$

3 step: finding a derivation of function:

$$x + x$$

here it is:

$$2.000$$

Finally... The 2 derivation of the expression:

$$2.000$$

BRITISH SCIENTISTS WERE SHOCKED, WHEN THEY COUNT THE 2 DERIVATION OF THIS EXPRESSION IN THE POINT (x = 1.000000)...

IT'S VALUE = 2.000000 !!!

Partial derivation of the expression on the variable 'x':

$$x + x$$

IN THE POINT (x = 1.000000) IT'S VALUE = 2.000000 !!!

Maklorens formula:

$$1.000 + 2.000 \cdot (x - 1.000) + (x - 1.000)^{2.000}$$

And remainig member is o maloe from:

$$(x - 1.000)^{3.000}$$
