CrInGeCrInGe Production. Super cringe introduction here: Let's calculate smth with expression given:

 $x^{3.000}$ 

Firstly, let's insert all constants and simplify it:

 $x^{3.000}$ 

BRITISH SCIENTISTS WERE SHOCKED, WHEN THEY COUNT IT!!! IN THE POINT (x = 0.000)IT'S VALUE = 0.000 !!!

1 step: finding a derivation of function:

 $\boldsymbol{x}$ 

here it is:

1.000

2 step: finding a derivation of function:

<sub>x</sub>3.000

here it is:

 $3.000 \cdot x^{2.000}$ 

Congratulations! The first derivation of the expression is:

 $3.000\cdot x^{2.000}$ 

IN THE POINT (x = 0.000)IT'S VALUE = 0.000!!!

Let's calculate the 2 derivation of the expression:

Calculating the 1 derivation of the expression:

1 step: finding a derivation of function:

x

here it is:

1.000

2 step: finding a derivation of function:

 $r^{3.000}$ 

here it is:

 $3.000 \cdot x^{2.000}$ 

Calculating the 2 derivation of the expression: 1 step: finding a derivation of function:

x

here it is:

1.000

2 step: finding a derivation of function:

 $x^{2.000}$ 

here it is:

 $2.000 \cdot x$ 

3 step: finding a derivation of function:

3.000

here it is:

0.000

4 step: finding a derivation of function:

 $3.000\cdot x^{2.000}$ 

here it is:

 $3.000 \cdot 2.000 \cdot x$ 

Finally... The 2 derivation of the expression:

 $3.000 \cdot 2.000 \cdot x$ 

BRITISH SCIENTISTS WERE SHOCKED, WHEN THEY COUNT THE 2 DERIVATION OF THIS EXPRESSION!!! IN THE POINT (x = 0.000)IT'S VALUE = 0.000!!!

Partial derivation of the expression on the variable 'x':

 $3.000 \cdot x^{2.000}$ 

IN THE POINT (x = 0.000) IT'S VALUE = 0.0000000!!!

Full derivation:

 $\sqrt{(3.000 \cdot x^{2.000})^{2.000}}$ 

IN THE POINT (x = 0.000)IT'S VALUE = 0.000 !!!

Maklorens formula for x near to 0.000000:

 $x^{3.000}$ 

And remainig member is o maloe from:

 $x^{3.000}$ 

Tangent equation in point 0.000: f(x) =

0.000

Normal equation in point 0.000: x = 0.000
