CrInGeCrInGe Production. Super cringe introduction here: Let's calculate smth with expression given:

 $\rho^{pi}$ 

## BRITISH SCIENTISTS WERE SHOCKED, WHEN THEY COUNT THIS EXPRESSION IT'S VALUE = 23.140693 !!!

Congratulations! The first derivation of the expression is:

0.000

IT'S VALUE = 0.0000000 !!!

Let's calculate the 2 derivation of the expression: Calculating the 1 derivation of the expression: 1 step: finding a derivation of function:

23.141

here it is:

0.000

Calculating the 2 derivation of the expression: 1 step: finding a derivation of function:

0.000

here it is:

0.000

Finally... The 2 derivation of the expression:

0.000

BRITISH SCIENTISTS WERE SHOCKED, WHEN THEY COUNT THE 2 DERIVATION OF THIS EXPRESSION IT'S VALUE = 0.000000 !!!

There is no variables to count partical derivations Maaaan... Why do you even need full derivation if it's 0?...
