```
BRITISH SCIENTISTS WERE SHOCKED, WHEN THEY COUNT IT!!!
    In the point (x = 3.000, y = 2.000) it's value = 0.564
    Personally, I've always thought about first derivation of something like that function... Haven't you?
    But now, by using informatics and math skills I feel that I'm prepared enough to calculate it!
    1 step. finding a derivation of:
    While preparing for exams, I learned a lot of new things, for example: (y)' = 1.000
    2 step. finding a derivation of:
    It's really easy to find: (y^{2.000})' = 2.000 \cdot y
    3 step. finding a derivation of:
    My roommate mumbled it in his sleep all night: (x)' = 1.000
    4 step. finding a derivation of:
    Sounds logical that it is the same as: (\sin x)' = \cos x
    5 step. finding a derivation of:
    \sin x \cdot y^{2.000}
    For centuries, people have hunted for the secret knowledge that: (\sin x \cdot y^{2.000})' = \cos x \cdot y^{2.000} + 2.000 \cdot y \cdot \sin x
    Congratulations! The first derivation of the expression is:
In the point (x = 3.000, y = 2.000) it's value = -3.395
  Let's calculate the 4 derivation of the expression:
   Calculating the 1 derivation of the expression:
    1 step. finding a derivation of:
    Sounds logical that it is the same as: (y)' = 1.000
    2 step. finding a derivation of:
    It's really easy to find: (y^{2.000})' = 2.000 \cdot y
    3 step. finding a derivation of:
    My roommate mumbled it in his sleep all night: (x)' = 1.000
    4 step. finding a derivation of:
    What if it equals: (\sin x)' = \cos x
    5 step. finding a derivation of:
    \sin x \cdot y^{2.000}
    It's really easy to find: (\sin x \cdot y^{2.000})' = \cos x \cdot y^{2.000} + 2.000 \cdot y \cdot \sin x
    Calculating the 2 derivation of the expression:
    1 step. finding a derivation of:
    Even my two-aged sister knows that it equals: (x)' = 1.000
    2 step. finding a derivation of:
    When I was child, my father always told me: "Remember, son: (\sin x)' = \cos x
    3 step. finding a derivation of:
    I spend the hole of my life to find the answer and finally it's: (y)' = 1.000
    4 step. finding a derivation of:
    Man... Just look: (2.000)' = 0.000
    5 step. finding a derivation of:
    For centuries, people have hunted for the secret knowledge that: (2.000 \cdot y)' = 2.000
    6 step. finding a derivation of:
    2.000 \cdot y \cdot \sin x
    It's really easy to find: (2.000 \cdot y \cdot \sin x)' = 2.000 \cdot \sin x + \cos x \cdot 2.000 \cdot y
    7 step. finding a derivation of:
    It's simple as fuck: (y)' = 1.000
    8 step. finding a derivation of:
    thanks to the results of my colleagues' scientific work, I know that it equals: (y^{2.000})' = 2.000 \cdot y
    9 step. finding a derivation of:
    When I was child, my father always told me: "Remember, son: (x)' = 1.000
    10 step. finding a derivation of:
    It's really easy to find: (\cos x)' = (-1.000) \cdot \sin x
   11 step. finding a derivation of: \cos x \cdot y^{2.000}
  I was asked not to tell anyone that: (\cos x \cdot y^{2.000})' = (-1.000) \cdot \sin x \cdot y^{2.000} + 2.000 \cdot y \cdot \cos x 12 step. finding a derivation of:
    \cos x \cdot y^{2.000} + 2.000 \cdot y \cdot \sin x
    For centuries, people have hunted for the secret knowledge that: (\cos x \cdot y^{2.000} + 2.000 \cdot y \cdot \sin x)' = (-1.000) \cdot \sin x \cdot y^{2.000} + 2.000 \cdot y \cdot \cos x + 2.000 \cdot \sin x + \cos x \cdot 2.000 \cdot y
    Calculating the 3 derivation of the expression:
    1 step. finding a derivation of:
    My roommate mumbled it in his sleep all night: (y)' = 1.000
```

Let's calculate smth with a given function: $f(x, y) = \sin x \cdot y^{2.000}$

Firstly, let's insert all constants and simplify this expression: $f(x, y) = \sin x \cdot y^{2.000}$

CrIn Ge CrIn Ge Production. Supercringe introduction here:

 $\cos x \cdot y^{2.000} + 2.000 \cdot y \cdot \sin x$

```
2 step. finding a derivation of:
 What if it equals: (2.000)' = 0.000
 3 step. finding a derivation of:
 Even my two-aged sister knows that it equals: (2.000 \cdot y)' = 2.000
 4 step. finding a derivation of:
 I spend the hole of my life to find the answer and finally it's: (x)' = 1.000
 5 step. finding a derivation of:
 Even my two-aged sister knows that it equals: (\cos x)' = (-1.000) \cdot \sin x
 6 step. finding a derivation of:
 \cos x \cdot 2.000 \cdot y
 While preparing for exams, I learned a lot of new things, for example: (\cos x \cdot 2.000 \cdot y)' = (-1.000) \cdot \sin x \cdot 2.000 \cdot y + 2.000 \cdot \cos x
 7 step. finding a derivation of:
 When I was child, my father always told me: "Remember, son: (x)' = 1.000
 8 step. finding a derivation of:
 Sounds logical that it is the same as: (\sin x)' = \cos x
 9 step. finding a derivation of:
 A true prince must know that it equals: (2.000)' = 0.000
 10 step. finding a derivation of:
 2.000 \cdot \sin x
 My roommate mumbled it in his sleep all night: (2.000 \cdot \sin x)' = 2.000 \cdot \cos x
 11 step. finding a derivation of:
 2.000 \cdot \sin x + \cos x \cdot 2.000 \cdot y
 My roommate mumbled it in his sleep all night: (2.000 \cdot \sin x + \cos x \cdot 2.000 \cdot y)' = 2.000 \cdot \cos x + (-1.000) \cdot \sin x \cdot 2.000 \cdot y + 2.000 \cdot \cos x
 12 step. finding a derivation of:
 If someone asked me that in the middle of the night, I wouldn't hesitate to say: (x)' = 1.000
 13 step. finding a derivation of:
 A true prince must know that it equals: (\cos x)' = (-1.000) \cdot \sin x
 14 step. finding a derivation of:
 My roommate mumbled it in his sleep all night: (y)' = 1.000
 15 step. finding a derivation of:
 While preparing for exams, I learned a lot of new things, for example: (2.000)' = 0.000
 16 step. finding a derivation of:
 It's really easy to find: (2.000 \cdot y)' = 2.000
 17 step. finding a derivation of:
 2.000 \cdot y \cdot \cos x
 It's really easy to find: (2.000 \cdot y \cdot \cos x)' = 2.000 \cdot \cos x + (-1.000) \cdot \sin x \cdot 2.000 \cdot y
 18 step. finding a derivation of:
 When I was child, my father always told me: "Remember, son: (y)' = 1.000
 19 step. finding a derivation of:
 What if it equals: (y^{2.000})' = 2.000 \cdot y
 20 step. finding a derivation of:
 If someone asked me that in the middle of the night, I wouldn't hesitate to say: (x)' = 1.000
 21 step. finding a derivation of:
 thanks to the results of my colleagues' scientific work, I know that it equals: (\sin x)' = \cos x
 22 step. finding a derivation of:
 A true prince must know that it equals: ((-1.000))' = 0.000
 23 step. finding a derivation of:
 (-1.000) \cdot \sin x
 A true prince must know that it equals: ((-1.000) \cdot \sin x)' = (-1.000) \cdot \cos x
 24 step. finding a derivation of:
 (-1.000) \cdot \sin x \cdot y^{2.000}
 When I was child, my father always told me: "Remember, son: ((-1.000) \cdot \sin x \cdot y^{2.000})' = (-1.000) \cdot \cos x \cdot y^{2.000} + 2.000 \cdot y \cdot (-1.000) \cdot \sin x
 25 step. finding a derivation of:
 For centuries, people have hunted for the secret knowledge that: ((-1.000) \cdot \sin x \cdot y^{2.000} + 2.000 \cdot y \cdot \cos x)' = (-1.000) \cdot \cos x \cdot y^{2.000} + 2.000 \cdot y \cdot (-1.000) \cdot \sin x + 2.000 \cdot \cos x + (-1.000) \cdot \sin x \cdot 2.000 \cdot y
 26 step. finding a derivation of:
(-1.000) \cdot \sin x \cdot y^{2.000} + 2.000 \cdot y \cdot \cos x + 2.000 \cdot \sin x + \cos x \cdot 2.000 \cdot y
A true prince must know that it equals: ((-1.000) \cdot \sin x \cdot y^{2.000} + 2.000 \cdot y \cdot \cos x + 2.000 \cdot \sin x \cdot 2.000 \cdot y \cdot \cos x + 2.000 \cdot \sin x \cdot 2.000 \cdot y \cdot (-1.000) \cdot \sin x \cdot 2.000 \cdot y \cdot (-1.000) \cdot \sin x \cdot 2.000 \cdot y + 2.000 \cdot \cos x + (-1.000) \cdot \sin x \cdot 2.000 \cdot y + 2.000 \cdot \cos x + (-1.000) \cdot \sin x \cdot 2.000 \cdot y + 2.000 \cdot \cos x + (-1.000) \cdot \sin x \cdot 2.000 \cdot y + 2.000 \cdot \cos x + (-1.000) \cdot \sin x \cdot 2.000 \cdot y + 2.000 \cdot \cos x + (-1.000) \cdot \sin x \cdot 2.000 \cdot y + 2.000 \cdot \cos x + (-1.000) \cdot \sin x \cdot 2.000 \cdot y + 2.000 \cdot \cos x + (-1.000) \cdot \sin x \cdot 2.000 \cdot y + 2.000 \cdot \cos x + (-1.000) \cdot \sin x \cdot 2.000 \cdot y + 2.000 \cdot \cos x + (-1.000) \cdot \sin x \cdot 2.000 \cdot y + 2.000 \cdot \cos x + (-1.000) \cdot \sin x \cdot 2.000 \cdot y + 2.000 \cdot \cos x + (-1.000) \cdot \sin x \cdot 2.000 \cdot y + 2.000 \cdot \cos x + (-1.000) \cdot \sin x \cdot 2.000 \cdot y + 2.000 \cdot \cos x + (-1.000) \cdot \sin x \cdot 2.000 \cdot y + 2.000 \cdot \cos x + (-1.000) \cdot \sin x \cdot 2.000 \cdot y + 2.000 \cdot \cos x + (-1.000) \cdot \sin x \cdot 2.000 \cdot y + 2.000 \cdot \cos x + (-1.000) \cdot \sin x \cdot 2.000 \cdot y + 2.000 \cdot \cos x + (-1.000) \cdot \sin x \cdot 2.000 \cdot y + 2.000 \cdot \cos x + (-1.000) \cdot \sin x \cdot 2.000 \cdot y + 2.000 \cdot \cos x + (-1.000) \cdot \sin x \cdot 2.000 \cdot y + 2.000 \cdot \cos x + (-1.000) \cdot \sin x \cdot 2.000 \cdot y + 2.000 \cdot \cos x + (-1.000) \cdot \sin x \cdot 2.000 \cdot y + 2.000 \cdot \cos x + (-1.000) \cdot \sin x \cdot 2.000 \cdot y + 2.000 \cdot \cos x + (-1.000) \cdot \sin x \cdot 2.000 \cdot y + 2.000 \cdot \cos x + (-1.000) \cdot \sin x \cdot 2.000 \cdot y + 2.000 \cdot \cos x + (-1.000) \cdot \sin x \cdot 2.000 \cdot y + 2.000 \cdot \cos x + (-1.000) \cdot \sin x \cdot 2.000 \cdot y + 2.000 \cdot \cos x + (-1.000) \cdot \sin x \cdot 2.000 \cdot y + 2.000 \cdot \cos x + (-1.000) \cdot \sin x \cdot 2.000 \cdot y + 2.000 \cdot \cos x + (-1.000) \cdot \sin x \cdot 2.000 \cdot y + 2.000 \cdot \cos x + (-1.000) \cdot \sin x \cdot 2.000 \cdot y + 2.000 \cdot \cos x + (-1.000) \cdot \sin x \cdot 2.000 \cdot y + 2.000 \cdot \cos x + (-1.000) \cdot \sin x \cdot 2.000 \cdot y + 2.000 \cdot \cos x + (-1.000) \cdot \cos x
 Calculating the 4 derivation of the expression:
 1 step. finding a derivation of:
 I spend the hole of my life to find the answer and finally it's: (x)' = 1.000
 2 step. finding a derivation of:
 It's simple as fuck: (\cos x)' = (-1.000) \cdot \sin x
 3 step. finding a derivation of:
 For centuries, people have hunted for the secret knowledge that: (2.000)' = 0.000
```

```
4 step. finding a derivation of:
2.000 \cdot \cos x
It's really easy to find: (2.000 \cdot \cos x)' = 2.000 \cdot (-1.000) \cdot \sin x
5 step. finding a derivation of:
It's really easy to find: (y)' = 1.000
6 step. finding a derivation of:
I spend the hole of my life to find the answer and finally it's: (2.000)' = 0.000
7 step. finding a derivation of:
I was asked not to tell anyone that: (2.000 \cdot y)' = 2.000
8 step. finding a derivation of:
If someone asked me that in the middle of the night, I wouldn't hesitate to say: (x)' = 1.000
9 step. finding a derivation of:
Even my two-aged sister knows that it equals: (\sin x)' = \cos x
10 step. finding a derivation of:
I spend the hole of my life to find the answer and finally it's: ((-1.000))' = 0.000
11 step. finding a derivation of:
(-1.000) \cdot \sin x
It's really easy to find: ((-1.000) \cdot \sin x)' = (-1.000) \cdot \cos x
12 step. finding a derivation of:
(-1.000) \cdot \sin x \cdot 2.000 \cdot y
It's really easy to find: ((-1.000) \cdot \sin x \cdot 2.000 \cdot y)' = (-1.000) \cdot \cos x \cdot 2.000 \cdot y + 2.000 \cdot (-1.000) \cdot \sin x
13 step. finding a derivation of:
(-1.000) \cdot \sin x \cdot 2.000 \cdot y + 2.000 \cdot \cos x
It's simple as fuck: ((-1.000) \cdot \sin x \cdot 2.000 \cdot y + 2.000 \cdot \cos x)' = (-1.000) \cdot \cos x \cdot 2.000 \cdot y + 2.000 \cdot (-1.000) \cdot \sin x + 2.000 \cdot (-1.000) \cdot \sin x
14 step. finding a derivation of:
It's simple as fuck: (x)' = 1.000
15 step. finding a derivation of:
A true prince must know that it equals: (\cos x)' = (-1.000) \cdot \sin x
16 step. finding a derivation of:
My roommate mumbled it in his sleep all night: (2.000)' = 0.000
17 step. finding a derivation of:
2.000 \cdot \cos x
I was asked not to tell anyone that: (2.000 \cdot \cos x)' = 2.000 \cdot (-1.000) \cdot \sin x
18 step. finding a derivation of:
2.000 \cdot \cos x + (-1.000) \cdot \sin x \cdot 2.000 \cdot y + 2.000 \cdot \cos x
I spend the hole of my life to find the answer and finally it's: (2.000 \cdot \cos x + (-1.000) \cdot \sin x \cdot 2.000 \cdot y + 2.000 \cdot (-1.000) \cdot \sin x + (-1.00
19 step. finding a derivation of:
It's really easy to find: (y)' = 1.000
20 step. finding a derivation of:
What if it equals: (2.000)' = 0.000
21 step. finding a derivation of:
While preparing for exams, I learned a lot of new things, for example: (2.000 \cdot y)' = 2.000
22 step. finding a derivation of:
Even my two-aged sister knows that it equals: (x)' = 1.000
23 step. finding a derivation of:
What if it equals: (\sin x)' = \cos x
24 step. finding a derivation of:
It's simple as fuck: ((-1.000))' = 0.000
25 step. finding a derivation of:
(-1.000) \cdot \sin x
My roommate mumbled it in his sleep all night: ((-1.000) \cdot \sin x)' = (-1.000) \cdot \cos x
26 step. finding a derivation of:
(-1.000) \cdot \sin x \cdot 2.000 \cdot y
It's simple as fuck: ((-1.000) \cdot \sin x \cdot 2.000 \cdot y)' = (-1.000) \cdot \cos x \cdot 2.000 \cdot y + 2.000 \cdot (-1.000) \cdot \sin x
27 step. finding a derivation of:
A true prince must know that it equals: (x)' = 1.000
28 step. finding a derivation of:
My roommate mumbled it in his sleep all night: (\cos x)' = (-1.000) \cdot \sin x
29 step. finding a derivation of:
A true prince must know that it equals: (2.000)' = 0.000
30 step. finding a derivation of:
2.000 \cdot \cos x
A true prince must know that it equals: (2.000 \cdot \cos x)' = 2.000 \cdot (-1.000) \cdot \sin x
31 step. finding a derivation of:
2.000 \cdot \cos x + (-1.000) \cdot \sin x \cdot 2.000 \cdot y
If someone asked me that in the middle of the night, I wouldn't hesitate to say: (2.000 \cdot \cos x + (-1.000) \cdot \sin x \cdot 2.000 \cdot y)' = 2.000 \cdot (-1.000) \cdot \sin x + (-1.000) \cdot \cos x \cdot 2.000 \cdot y + 2.000 \cdot (-1.000) \cdot \sin x
32 step. finding a derivation of:
```

```
I spend the hole of my life to find the answer and finally it's: (x)' = 1.000
             33 step. finding a derivation of:
             When I was child, my father always told me: "Remember, son: (\sin x)' = \cos x
             34 step. finding a derivation of:
             If someone asked me that in the middle of the night, I wouldn't hesitate to say: ((-1.000))' = 0.000
             35 step. finding a derivation of:
             (-1.000) \cdot \sin x
             thanks to the results of my colleagues' scientific work, I know that it equals: ((-1.000) \cdot \sin x)' = (-1.000) \cdot \cos x

             40 step. finding a derivation of:
             I was asked not to tell anyone that: (y)' = 1.000
             41 step. finding a derivation of:
             A true prince must know that it equals: (y^{2.000})' = 2.000 \cdot y
             42 step. finding a derivation of:
             Man... Just look: (x)' = 1.000
             43 step. finding a derivation of:
             My roommate mumbled it in his sleep all night: (\cos x)' = (-1.000) \cdot \sin x
             44 step. finding a derivation of:
             It's simple as fuck: ((-1.000))' = 0.000
             45 step. finding a derivation of:
             (-1.000) \cdot \cos x
             I was asked not to tell anyone that: ((-1.000) \cdot \cos x)' = (-1.000) \cdot (-1.000) \cdot \sin x
             46 step. finding a derivation of:
             (-1.000) \cdot \cos x \cdot y^{2.000}
             If someone asked me that in the middle of the night, I wouldn't hesitate to say: ((-1.000) \cdot \cos x \cdot y^{2.000})' = (-1.000) \cdot (-1.000) \cdot \sin x \cdot y^{2.000} + 2.000 \cdot y \cdot (-1.000) \cdot \cos x
             47 step. finding a derivation of:
             (-1.000) \cdot \cos x \cdot y^{2.000} + 2.000 \cdot y \cdot (-1.000) \cdot \sin x
             \text{Man... Just look: } ((-1.000) \cdot \cos x \cdot y^{2.000} + 2.000 \cdot y \cdot (-1.000) \cdot \sin x)' = (-1.000) \cdot (-1.000) \cdot \sin x \cdot y^{2.000} + 2.000 \cdot y \cdot (-1.000) \cdot \cos x + 2.000 \cdot (-1.000) \cdot \sin x + (-1.000) \cdot \cos x \cdot 2.000 \cdot y
             48 step. finding a derivation of:
             (-1.000) \cdot \cos x \cdot y^{2.000} + 2.000 \cdot y \cdot (-1.000) \cdot \sin x + 2.000 \cdot \cos x + (-1.000) \cdot \sin x \cdot 2.000 \cdot y
             When I was child, my father always told me: "Remember, son: ((-1.000) \cdot \cos x \cdot y^{2.000} + 2.000 \cdot y \cdot (-1.000) \cdot \sin x \cdot 2.000 \cdot y \cdot (-1.000) \cdot \sin x + (-1.000) \cdot \cos x \cdot 2.000 \cdot y + 2.000 \cdot (-1.000) \cdot \sin x + (-1.000) \cdot \sin x \cdot 2.000 \cdot y \cdot (-1.000) \cdot \sin x \cdot 2.000 \cdot y \cdot (-1.000) \cdot \sin x \cdot 2.000 \cdot y \cdot (-1.000) \cdot \sin x \cdot 2.000 \cdot y \cdot (-1.000) \cdot \sin x \cdot 2.000 \cdot y \cdot (-1.000) \cdot \sin x \cdot 2.000 \cdot y \cdot (-1.000) \cdot \sin x \cdot 2.000 \cdot y \cdot (-1.000) \cdot \sin x \cdot 2.000 \cdot y \cdot (-1.000) \cdot \sin x \cdot 2.000 \cdot y \cdot (-1.000) \cdot \sin x \cdot 2.000 \cdot y \cdot (-1.000) \cdot \sin x \cdot 2.000 \cdot y \cdot (-1.000) \cdot \sin x \cdot 2.000 \cdot y \cdot (-1.000) \cdot \sin x \cdot 2.000 \cdot y \cdot (-1.000) \cdot \sin x \cdot 2.000 \cdot y \cdot (-1.000) \cdot \sin x \cdot 2.000 \cdot y \cdot (-1.000) \cdot \sin x \cdot 2.000 \cdot y \cdot (-1.000) \cdot \sin x \cdot 2.000 \cdot y \cdot (-1.000) \cdot \sin x \cdot 2.000 \cdot y \cdot (-1.000) \cdot \sin x \cdot 2.000 \cdot y \cdot (-1.000) \cdot \sin x \cdot 2.000 \cdot y \cdot (-1.000) \cdot \sin x \cdot 2.000 \cdot y \cdot (-1.000) \cdot \sin x \cdot 2.000 \cdot y \cdot (-1.000) \cdot \sin x \cdot 2.000 \cdot y \cdot (-1.000) \cdot \sin x \cdot 2.000 \cdot y \cdot (-1.000) \cdot \sin x \cdot 2.000 \cdot y \cdot (-1.000) \cdot \sin x \cdot 2.000 \cdot y \cdot (-1.000) \cdot \sin x \cdot 2.000 \cdot y \cdot (-1.000) \cdot \sin x \cdot 2.000 \cdot y \cdot (-1.000) \cdot \sin x \cdot 2.000 \cdot y \cdot (-1.000) \cdot \sin x \cdot 2.000 \cdot y \cdot (-1.000) \cdot \sin x \cdot 2.000 \cdot y \cdot (-1.000) \cdot \sin x \cdot 2.000 \cdot y \cdot (-1.000) \cdot \sin x \cdot 2.000 \cdot y \cdot (-1.000) \cdot \sin x \cdot 2.000 \cdot y \cdot (-1.000) \cdot \sin x \cdot 2.000 \cdot y \cdot (-1.000) \cdot \sin x \cdot 2.000 \cdot y \cdot (-1.000) \cdot \sin x \cdot 2.000 \cdot y \cdot (-1.000) \cdot \sin x \cdot 2.000 \cdot y \cdot (-1.000) \cdot \sin x \cdot 2.000 \cdot y \cdot (-1.000) \cdot \sin x \cdot 2.000 \cdot y \cdot (-1.000) \cdot \sin x \cdot 2.000 \cdot y \cdot (-1.000) \cdot \sin x \cdot 2.000 \cdot y \cdot (-1.000) \cdot \sin x \cdot 2.000 \cdot y \cdot (-1.000) \cdot \sin x \cdot 2.000 \cdot y \cdot (-1.000) \cdot \sin x \cdot 2.000 \cdot y \cdot (-1.000) \cdot \sin x \cdot 2.000 \cdot y \cdot (-1.000) \cdot \sin x \cdot 2.000 \cdot y \cdot (-1.000) \cdot \sin x \cdot 2.000 \cdot y \cdot (-1.000) \cdot \sin x \cdot 2.000 \cdot y \cdot (-1.000) \cdot \sin x \cdot 2.000 \cdot y \cdot (-1.000) \cdot \sin x \cdot 2.000 \cdot y \cdot (-1.000) \cdot \sin x \cdot 2.000 \cdot y \cdot (-1.000) \cdot \sin x \cdot 2.000 \cdot y \cdot (-1.000) \cdot \sin x \cdot 2.000 \cdot y \cdot (-1.000) \cdot (
             (-1.000) \cdot \cos x \cdot y^{2.000} + 2.000 \cdot y \cdot (-1.000) \cdot \sin x + 2.000 \cdot \cos x + (-1.000) \cdot \sin x \cdot 2.000 \cdot y + 2.000 \cdot \cos x + (-1.000) \cdot \sin x \cdot 2.000 \cdot y + 2.000 \cdot \cos x + (-1.000) \cdot \sin x \cdot 2.000 \cdot y + 2.000 \cdot \cos x + (-1.000) \cdot \sin x \cdot 2.000 \cdot y + 2.000 \cdot \cos x + (-1.000) \cdot \sin x \cdot 2.000 \cdot \cos x + (-1.000) \cdot \sin x \cdot 2.000 \cdot \cos x + (-1.000) \cdot \sin x \cdot 2.000 \cdot \cos x + (-1.000) \cdot \sin x \cdot 2.000 \cdot \cos x + (-1.000) \cdot \sin x \cdot 2.000 \cdot \cos x + (-1.000) \cdot \sin x \cdot 2.000 \cdot \cos x + (-1.000) \cdot \sin x \cdot 2.000 \cdot \cos x + (-1.000) \cdot \sin x \cdot 2.000 \cdot \cos x + (-1.000) \cdot \sin x \cdot 2.000 \cdot \cos x + (-1.000) \cdot \sin x \cdot 2.000 \cdot \cos x + (-1.000) \cdot \sin x \cdot 2.000 \cdot \cos x + (-1.000) \cdot \sin x \cdot 2.000 \cdot \cos x + (-1.000) \cdot \sin x \cdot 2.000 \cdot \cos x + (-1.000) \cdot \sin x \cdot 2.000 \cdot \cos x + (-1.000) \cdot \sin x \cdot 2.000 \cdot \cos x + (-1.000) \cdot \sin x \cdot 2.000 \cdot \cos x + (-1.000) \cdot \sin x \cdot 2.000 \cdot \cos x + (-1.000) \cdot \sin x \cdot 2.000 \cdot \cos x + (-1.000) \cdot \sin x \cdot 2.000 \cdot \cos x + (-1.000) \cdot \sin x \cdot 2.000 \cdot \cos x + (-1.000) \cdot \cos x + (-1.000
             It's really easy to find: ((-1.000) \cdot \cos x \cdot y^{2.000} + 2.000 \cdot y + 2.000 \cdot \cos x + (-1.000) \cdot \sin x + (-1.000
             Finally... The 4 derivation of the expression:
                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                     (-1.000) \cdot (-1.000) \cdot \sin x \cdot y^{2.000} + 2.000 \cdot y \cdot (-1.000) \cdot \cos x + 2.000 \cdot (-1.000) \cdot \sin x + (-1.000) \cdot \cos x \cdot 2.000 \cdot y + 2.000 \cdot (-1.000) \cdot \sin x + (-1.000) 
    BRITISH SCIENTISTS WERE SHOCKED AGAIN, WHEN THEY COUNT THE 4 DERIVATION OF THIS EXPRESSION!!!
            In the point (x = 3.000, y = 2.000) it's value = 14.711
             Partial derivation of the expression on the variable x:
                      \frac{\partial f}{\partial x} = 4.000 \cdot \cos x
               In the point (x = 3.000, y = 2.000) it's value = -3.959970!!!
             Partial derivation of the expression on the variable y:
                 \frac{\partial f}{\partial y} = 0.141 \cdot 2.000 \cdot y
             In the point (x = 3.000, y = 2.000) it's value = 0.564480 !!!
             Full derivation:
                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                         \sqrt{(4.000 \cdot \cos x)^{2.000} + (0.141 \cdot 2.000 \cdot y)^{2.000}}
In the point (x = 3.000, y = 2.000) it's value = 4.000!!!
```

Let's consider the expression as a function of x variable: $f(x) = 4.000 \cdot \sin x$

Graph f(x):

Maklorens formula for $x \to 3.000$: $f(x) = 0.564 + (-3.960) \cdot (x - 3.000) + (-0.282) \cdot (x - 3.000)^{2.000} + 0.660 \cdot (x - 3.000)^{3.000} + 0.024 \cdot (x - 3.000)^{4.000} + (-0.033) \cdot (x - 3.000)^{5.000} + o((x - 3.000)^{5.000})$

	υ	

Tangent equation in the point x = 0.000: $f(x) = 4.000 \cdot x$ Normal equation in the point x = 0.000: $f(x) = (-0.250) \cdot (x - 0.000) + 0.000$
