CrIn Ge CrIn Ge Production. Supercringe introduction here:\\
   1 Some basic knowledge about researching problem...
    Let's calculate smth with a given function: f(x, y) = (\sin(x \cdot y))^{3.000}
        Firstly, let's simplify this expression (if possible): f(x, y) = (\sin(x \cdot y))^{3.000}
 2 Exploration of the expression as a function of multiple variables
    Calculation value of function in the point BRITISH SCIENTISTS WERE SHOCKED, WHEN THEY COUNT IT!!!
         In the point M_0(x_0, y_0) = (3.142, 2.000) it's value = -0.00000
           Personally, I've always thought about first derivation of something like that function... Haven't you?
         But now, by using informatics and math skills I feel that I'm prepared enough to calculate it!
           1 step: Finding a derivation of y
           While preparing for exams, I learned a lot of new things, for example:
         (y)' = \dots = [\text{top secret}] = \dots =
    = 1.000
         2 step: Finding a derivation of x
         It's really easy to find:
         (x)' = \dots = [\text{top secret}] = \dots =
    = 1.000
         3 step: Finding a derivation of x \cdot y
         My roommate mumbled it in his sleep all night:
         (x \cdot y)' = \dots = [\text{top secret}] = \dots =
    = y + x
         4 step: Finding a derivation of \sin(x \cdot y)
         Sounds logical that it is the same as:
         (\sin(x \cdot y))' = \dots = [\text{top secret}] = \dots =
    = \cos(x \cdot y) \cdot (y + x)
       5 step: Finding a derivation of (\sin(x \cdot y))^{3.000}
         For centuries, people have hunted for the secret knowledge that:
         ((\sin(x \cdot y))^{3.000})' = \dots = [\text{top secret}] = \dots =
    = 3.000 \cdot (\sin(x \cdot y))^{2.000} \cdot \cos(x \cdot y) \cdot (y + x)
         Congratulations! The first derivation of the expression is:
         f'(x, y) = 3.000 \cdot (\sin(x \cdot y))^{2.000} \cdot \cos(x \cdot y) \cdot (y + x)
         In the point M_0(x_0, y_0) = (3.142, 2.000) it's value = 0.00000
    Finding the 3 derivation Let's find the 1 derivation of the expression:
         1 step: Finding a derivation of y
         Sounds logical that it is the same as:
           (y)' = \dots = [\text{top secret}] = \dots =
    = 1.000
         2 step: Finding a derivation of x
         It's really easy to find:
         (x)' = \dots = [\text{top secret}] = \dots =
    = 1.000
         3 step: Finding a derivation of x \cdot y
         My roommate mumbled it in his sleep all night:
         (x \cdot y)' = \dots = [\text{top secret}] = \dots =
    = y + x
         4 step: Finding a derivation of \sin(x \cdot y)
           What if:
         (\sin(x \cdot y))' = \dots = [\text{top secret}] = \dots =
    = \cos(x \cdot y) \cdot (y + x)
        5 step: Finding a derivation of (\sin(x \cdot y))^{3.000}
         It's really easy to find:
  ((\sin(x \cdot y))^{3.000})' = \dots = [\text{top secret}] = \dots =
= 3.000 \cdot (\sin(x \cdot y))^{2.000} \cdot \cos(x \cdot y) \cdot (y + x)
         Let's find the 2 derivation of the expression:
           1 step: Finding a derivation of x
         Even my two-aged sister knows that:
         (x)' = \dots = [\text{top secret}] = \dots =
    = 1.000
         2 step: Finding a derivation of y
         When I was child, my father always told me: "Remember, son:
           (y)' = \dots = [\text{top secret}] = \dots =
   = 1.000
        3 step: Finding a derivation of y + x
           I spend the hole of my life to find the answer and finally it's:
           (y+x)' = \dots = [\text{top secret}] = \dots =
    = 2.000
         4 step: Finding a derivation of y
         Man... Just look:
           (y)' = \dots = [\text{top secret}] = \dots =
    = 1.000
         5 step: Finding a derivation of x
         For centuries, people have hunted for the secret knowledge that:
         (x)' = \dots = [\text{top secret}] = \dots =
    = 1.000
         6 step: Finding a derivation of x \cdot y
         It's really easy to find:
         (x \cdot y)' = \dots = [\text{top secret}] = \dots =
         7 step: Finding a derivation of \cos(x \cdot y)
         It's simple as fuck:
         (\cos(x \cdot y))' = \dots = [\text{top secret}] = \dots =
   = (-1.000) \cdot \sin(x \cdot y) \cdot (y + x)
         8 step: Finding a derivation of \cos(x \cdot y) \cdot (y + x)
           thanks to the results of my colleagues' scientific work, I know that:
         (\cos(x \cdot y) \cdot (y + x))' = \dots = [\text{top secret}] = \dots =
    = (-1.000) \cdot \sin(x \cdot y) \cdot (y + x) \cdot (y + x) + 2.000 \cdot \cos(x \cdot y)
         9 step: Finding a derivation of y
           When I was child, my father always told me: "Remember, son:
         (y)' = \dots = [\text{top secret}] = \dots =
    = 1.000
         10 step: Finding a derivation of x
         It's really easy to find:
         (x)' = \dots = [\text{top secret}] = \dots =
    = 1.000
         11 step: Finding a derivation of x \cdot y
         I was asked not to tell anyone that:
         (x \cdot y)' = \dots = [\text{top secret}] = \dots =
    = y + x
         12 step: Finding a derivation of \sin(x \cdot y)
         For centuries, people have hunted for the secret knowledge that:
         (\sin(x \cdot y))' = \dots = [\text{top secret}] = \dots =
    = \cos(x \cdot y) \cdot (y + x)
        13 step: Finding a derivation of (\sin(x \cdot y))^{2.000}
         My roommate mumbled it in his sleep all night:
         ((\sin(x \cdot y))^{2.000})' = \dots = [\text{top secret}] = \dots =
    = 2.000 \cdot \sin(x \cdot y) \cdot \cos(x \cdot y) \cdot (y + x)
         14 step: Finding a derivation of 3.000
           What if:
         (3.000)' = \dots = [\text{top secret}] = \dots =
    = 0.000
        15 step: Finding a derivation of 3.000 \cdot (\sin(x \cdot y))^{2.000}
         Even my two-aged sister knows that:
           (3.000 \cdot (\sin(x \cdot y))^{2.000})' = \dots = [\text{top secret}] = \dots =
    = 3.000 \cdot 2.000 \cdot \sin(x \cdot y) \cdot \cos(x \cdot y) \cdot (y + x)
        16 step: Finding a derivation of 3.000 \cdot (\sin(x \cdot y))^{2.000} \cdot \cos(x \cdot y) \cdot (y + x)
         I spend the hole of my life to find the answer and finally it's:
           (3.000 \cdot (\sin(x \cdot y))^{2.000} \cdot \cos(x \cdot y) \cdot (y + x))' = \dots = [\text{top secret}] = \dots =
    =3.000 \cdot 2.000 \cdot \sin{(x \cdot y)} \cdot \cos{(x \cdot y)} \cdot (y+x) \cdot \cos{(x \cdot y)} \cdot (y+x) + ((-1.000) \cdot \sin{(x \cdot y)} \cdot (y+x) \cdot (y+x) + 2.000 \cdot \cos{(x \cdot y)}) \cdot 3.000 \cdot (\sin{(x \cdot y)})^{2.000}
         Let's find the 3 derivation of the expression:
           1 step: Finding a derivation of y
         Even my two-aged sister knows that:
           (y)' = \dots = [\text{top secret}] = \dots =
    = 1.000
         2 step: Finding a derivation of x
         While preparing for exams, I learned a lot of new things, for example:
           (x)' = \dots = [\text{top secret}] = \dots =
    = 1.000
         3 step: Finding a derivation of x \cdot y
         When I was child, my father always told me: "Remember, son:
         (x \cdot y)' = \dots = [\text{top secret}] = \dots =
    = y + x
         4 step: Finding a derivation of \sin(x \cdot y)
         Sounds logical that it is the same as:
           (\sin(x \cdot y))' = \dots = [\text{top secret}] = \dots =
    =\cos(x\cdot y)\cdot(y+x)
         5 step: Finding a derivation of (\sin(x \cdot y))^{2.000}
         A true prince must know that:
   = 2.000 \cdot \sin(x \cdot y) \cdot \cos(x \cdot y) \cdot (y + x)
         6 step: Finding a derivation of 3.000
           My roommate mumbled it in his sleep all night:
           (3.000)' = \dots = [\text{top secret}] = \dots =
    = 0.000
         7 step: Finding a derivation of 3.000 \cdot (\sin(x \cdot y))^{2.000}
         My roommate mumbled it in his sleep all night:
         (3.000 \cdot (\sin(x \cdot y))^{2.000})' = \dots = [\text{top secret}] = \dots =
    = 3.000 \cdot 2.000 \cdot \sin(x \cdot y) \cdot \cos(x \cdot y) \cdot (y + x)
         8 step: Finding a derivation of y
         If someone asked me that in the middle of the night, I wouldn't hesitate to say:
          (y)' = \dots = [\text{top secret}] = \dots =
    = 1.000
         9 step: Finding a derivation of x
         A true prince must know that:
         (x)' = \dots = [\text{top secret}] = \dots =
    = 1.000
         10 step: Finding a derivation of x \cdot y
         My roommate mumbled it in his sleep all night:
         (x \cdot y)' = \dots = [\text{top secret}] = \dots =
         11 step: Finding a derivation of \cos(x \cdot y)
         While preparing for exams, I learned a lot of new things, for example:
         (\cos(x \cdot y))' = \dots = [\text{top secret}] = \dots =
    = (-1.000) \cdot \sin(x \cdot y) \cdot (y + x)
         12 step: Finding a derivation of 2.000
         It's really easy to find:
         (2.000)' = \dots = [\text{top secret}] = \dots =
    = 0.000
         13 step: Finding a derivation of 2.000 \cdot \cos(x \cdot y)
         It's really easy to find:
         (2.000 \cdot \cos(x \cdot y))' = \dots = [\text{top secret}] = \dots =
   = 2.000 \cdot (-1.000) \cdot \sin(x \cdot y) \cdot (y + x)
         14 step: Finding a derivation of x
           When I was child, my father always told me: "Remember, son:
         (x)' = \dots = [\text{top secret}] = \dots =
    = 1.000
         15 step: Finding a derivation of y
         What if:
         (y)' = \dots = [\text{top secret}] = \dots =
    = 1.000
         16 step: Finding a derivation of y + x
         If someone asked me that in the middle of the night, I wouldn't hesitate to say:
         (y+x)' = \dots = [\text{top secret}] = \dots =
    = 2.000
         17 step: Finding a derivation of x
           thanks to the results of my colleagues' scientific work, I know that:
         (x)' = \dots = [\text{top secret}] = \dots =
    = 1.000
         18 step: Finding a derivation of y
         A true prince must know that:
         (y)' = \dots = [\text{top secret}] = \dots =
    = 1.000
         19 step: Finding a derivation of y + x
         A true prince must know that:
         (y+x)' = \dots = [\text{top secret}] = \dots =
         20 step: Finding a derivation of y
         When I was child, my father always told me: "Remember, son:
           (y)' = \dots = [\text{top secret}] = \dots =
    = 1.000
         21 step: Finding a derivation of x
         For centuries, people have hunted for the secret knowledge that:
         (x)' = \dots = [\text{top secret}] = \dots =
    = 1.000
         22 step: Finding a derivation of x \cdot y
         A true prince must know that:
         (x \cdot y)' = \dots = [\text{top secret}] = \dots =
         23 step: Finding a derivation of \sin(x \cdot y)
         I spend the hole of my life to find the answer and finally it's:
           (\sin(x \cdot y))' = \dots = [\text{top secret}] = \dots =
    =\cos(x\cdot y)\cdot(y+x)
         24 step: Finding a derivation of -1.000
           It's simple as fuck:
         (-1.000)' = \dots = [\text{top secret}] = \dots =
    = 0.000
         25 step: Finding a derivation of (-1.000) \cdot \sin(x \cdot y)
         For centuries, people have hunted for the secret knowledge that:
         ((-1.000) \cdot \sin(x \cdot y))' = \dots = [\text{top secret}] = \dots =
    = (-1.000) \cdot \cos(x \cdot y) \cdot (y + x)
         26 step: Finding a derivation of (-1.000) \cdot \sin(x \cdot y) \cdot (y + x)
         It's really easy to find:
         ((-1.000) \cdot \sin(x \cdot y) \cdot (y + x))' = \dots = [\text{top secret}] = \dots =
    = (-1.000) \cdot \cos(x \cdot y) \cdot (y + x) \cdot (y + x) + 2.000 \cdot (-1.000) \cdot \sin(x \cdot y)
         27 step: Finding a derivation of (-1.000) \cdot \sin(x \cdot y) \cdot (y + x) \cdot (y + x)
         It's really easy to find:
         ((-1.000) \cdot \sin(x \cdot y) \cdot (y + x) \cdot (y + x))' = \dots = [\text{top secret}] = \dots =
    = ((-1.000) \cdot \cos{(x \cdot y)} \cdot (y + x) \cdot (y + x) + 2.000 \cdot (-1.000) \cdot \sin{(x \cdot y)}) \cdot (y + x) + 2.000 \cdot (-1.000) \cdot \sin{(x \cdot y)} \cdot (y + x)
         28 step: Finding a derivation of (-1.000) \cdot \sin(x \cdot y) \cdot (y + x) \cdot (y + x) + 2.000 \cdot \cos(x \cdot y)
         I spend the hole of my life to find the answer and finally it's:
         ((-1.000) \cdot \sin(x \cdot y) \cdot (y + x) \cdot (y + x) + 2.000 \cdot \cos(x \cdot y))' = \dots = [\text{top secret}] = \dots = ((-1.000) \cdot \sin(x \cdot y) \cdot (y + x) \cdot (y + x) + 2.000 \cdot \cos(x \cdot y))' = \dots = [\text{top secret}] = \dots = ((-1.000) \cdot \sin(x \cdot y) \cdot (y + x) \cdot (y + x) + 2.000 \cdot \cos(x \cdot y))' = \dots = [\text{top secret}] = \dots = ((-1.000) \cdot \cos(x \cdot y))' = (
    = ((-1.000) \cdot \cos{(x \cdot y)} \cdot (y + x) \cdot (y + x) + 2.000 \cdot (-1.000) \cdot \sin{(x \cdot y)}) \cdot (y + x) + 2.000 \cdot (-1.000) \cdot \sin{(x \cdot y)} \cdot (y + x) + 2.000 \cdot (-1.000) \cdot \sin{(x \cdot y)} \cdot (y + x) + 2.000 \cdot (-1.000) \cdot \sin{(x \cdot y)} \cdot (y + x) + 2.000 \cdot (-1.000) \cdot \sin{(x \cdot y)} \cdot (y + x) + 2.000 \cdot (-1.000) \cdot \sin{(x \cdot y)} \cdot (y + x) + 2.000 \cdot (-1.000) \cdot \sin{(x \cdot y)} \cdot (y + x) + 2.000 \cdot (-1.000) \cdot \sin{(x \cdot y)} \cdot (y + x) + 2.000 \cdot (-1.000) \cdot \sin{(x \cdot y)} \cdot (y + x) + 2.000 \cdot (-1.000) \cdot \sin{(x \cdot y)} \cdot (y + x) + 2.000 \cdot (-1.000) \cdot \sin{(x \cdot y)} \cdot (y + x) + 2.000 \cdot (-1.000) \cdot \sin{(x \cdot y)} \cdot (y + x) + 2.000 \cdot (-1.000) \cdot \sin{(x \cdot y)} \cdot (y + x) + 2.000 \cdot (-1.000) \cdot \sin{(x \cdot y)} \cdot (y + x) + 2.000 \cdot (-1.000) \cdot \sin{(x \cdot y)} \cdot (y + x) + 2.000 \cdot (-1.000) \cdot \sin{(x \cdot y)} \cdot (y + x) + 2.000 \cdot (-1.000) \cdot \sin{(x \cdot y)} \cdot (y + x) + 2.000 \cdot (-1.000) \cdot \sin{(x \cdot y)} \cdot (y + x) + 2.000 \cdot (-1.000) \cdot \sin{(x \cdot y)} \cdot (y + x) + 2.000 \cdot (-1.000) \cdot \sin{(x \cdot y)} \cdot (y + x) + 2.000 \cdot (-1.000) \cdot \sin{(x \cdot y)} \cdot (y + x) + 2.000 \cdot (-1.000) \cdot \sin{(x \cdot y)} \cdot (y + x) + 2.000 \cdot (-1.000) \cdot \sin{(x \cdot y)} \cdot (y + x) + 2.000 \cdot (-1.000) \cdot \sin{(x \cdot y)} \cdot (y + x) + 2.000 \cdot (-1.000) \cdot \sin{(x \cdot y)} \cdot (y + x) + 2.000 \cdot (-1.000) \cdot \sin{(x \cdot y)} \cdot (y + x) + 2.000 \cdot (-1.000) \cdot \sin{(x \cdot y)} \cdot (y + x) + 2.000 \cdot (-1.000) \cdot \sin{(x \cdot y)} \cdot (y + x) + 2.000 \cdot (-1.000) \cdot \sin{(x \cdot y)} \cdot (y + x) + 2.000 \cdot (-1.000) \cdot \sin{(x \cdot y)} \cdot (y + x) + 2.000 \cdot (-1.000) \cdot \sin{(x \cdot y)} \cdot (y + x) + 2.000 \cdot (-1.000) \cdot \sin{(x \cdot y)} \cdot (y + x) + 2.000 \cdot (-1.000) \cdot \sin{(x \cdot y)} \cdot (y + x) + 2.000 \cdot (-1.000) \cdot \sin{(x \cdot y)} \cdot (y + x) + 2.000 \cdot (-1.000) \cdot \sin{(x \cdot y)} \cdot (y + x) + 2.000 \cdot (-1.000) \cdot \sin{(x \cdot y)} \cdot (y + x) + 2.000 \cdot (-1.000) \cdot \sin{(x \cdot y)} \cdot (y + x) + 2.000 \cdot (-1.000) \cdot \sin{(x \cdot y)} \cdot (y + x) + 2.000 \cdot (-1.000) \cdot \sin{(x \cdot y)} \cdot (y + x) + 2.000 \cdot (-1.000) \cdot \sin{(x \cdot y)} \cdot (y + x) + 2.000 \cdot (-1.000) \cdot \sin{(x \cdot y)} \cdot (y + x) + 2.000 \cdot (-1.000) \cdot \sin{(x \cdot y)} \cdot (y + x) + 2.000 \cdot (-1.000) \cdot (y + x) + 2.000 \cdot (y + x) + 2.000
         29 step: Finding a derivation of ((-1.000) \cdot \sin(x \cdot y) \cdot (y + x) \cdot (y + x) + 2.000 \cdot \cos(x \cdot y)) \cdot 3.000 \cdot (\sin(x \cdot y))^{2.000}
         I was asked not to tell anyone that:
         (((-1.000) \cdot \sin(x \cdot y) \cdot (y + x) \cdot (y + x) + 2.000 \cdot \cos(x \cdot y)) \cdot 3.000 \cdot (\sin(x \cdot y))^{2.000})' = \dots = [\text{top secret}] = \dots = [(-1.000) \cdot \sin(x \cdot y) \cdot (y + x) \cdot 
    = \left( \left( (-1.000) \cdot \cos \left( x \cdot y \right) \cdot \left( y + x \right) + 2.000 \cdot \left( -1.000 \right) \cdot \sin \left( x \cdot y \right) \right) \cdot \left( y + x \right) + 2.000 \cdot \left( -1.000 \right) \cdot \sin \left( x \cdot y \right) \cdot \left( y + x \right) + 2.000 \cdot \left( -1.000 \right) \cdot \sin \left( x \cdot y \right) \cdot \left( y + x \right) + 2.000 \cdot \left( -1.000 \right) \cdot \sin \left( x \cdot y \right) \cdot \left( y + x \right) + 2.000 \cdot \left( -1.000 \right) \cdot \sin \left( x \cdot y \right) \cdot \left( y + x \right) + 2.000 \cdot \left( -1.000 \right) \cdot \sin \left( x \cdot y \right) \cdot \left( y + x \right) + 2.000 \cdot \left( -1.000 \right) \cdot \sin \left( x \cdot y \right) \cdot \left( y + x \right) + 2.000 \cdot \left( -1.000 \right) \cdot \sin \left( x \cdot y \right) \cdot \left( y + x \right) + 2.000 \cdot \left( -1.000 \right) \cdot \sin \left( x \cdot y \right) \cdot \left( y + x \right) + 2.000 \cdot \left( -1.000 \right) \cdot \sin \left( x \cdot y \right) \cdot \left( y + x \right) + 2.000 \cdot \left( -1.000 \right) \cdot \sin \left( x \cdot y \right) \cdot \left( y + x \right) + 2.000 \cdot \left( -1.000 \right) \cdot \sin \left( x \cdot y \right) \cdot \left( y + x \right) + 2.000 \cdot \left( -1.000 \right) \cdot \sin \left( x \cdot y \right) \cdot \left( y + x \right) + 2.000 \cdot \left( -1.000 \right) \cdot \sin \left( x \cdot y \right) \cdot \left( y + x \right) + 2.000 \cdot \left( -1.000 \right) \cdot \sin \left( x \cdot y \right) \cdot \left( y + x \right) + 2.000 \cdot \left( -1.000 \right) \cdot \sin \left( x \cdot y \right) \cdot \left( y + x \right) + 2.000 \cdot \left( -1.000 \right) \cdot \sin \left( x \cdot y \right) \cdot \left( y + x \right) + 2.000 \cdot \left( -1.000 \right) \cdot \sin \left( x \cdot y \right) \cdot \left( y + x \right) + 2.000 \cdot \left( -1.000 \right) \cdot \sin \left( x \cdot y \right) \cdot \left( y + x \right) + 2.000 \cdot \left( -1.000 \right) \cdot \sin \left( x \cdot y \right) \cdot \left( y + x \right) + 2.000 \cdot \left( -1.000 \right) \cdot \sin \left( x \cdot y \right) \cdot \left( y + x \right) + 2.000 \cdot \left( -1.000 \right) \cdot \sin \left( x \cdot y \right) \cdot \left( y + x \right) + 2.000 \cdot \left( -1.000 \right) \cdot \sin \left( x \cdot y \right) \cdot \left( y + x \right) + 2.000 \cdot \left( -1.000 \right) \cdot \sin \left( x \cdot y \right) \cdot \left( y + x \right) + 2.000 \cdot \left( -1.000 \right) \cdot \sin \left( x \cdot y \right) \cdot \left( y + x \right) + 2.000 \cdot \left( -1.000 \right) \cdot \sin \left( x \cdot y \right) \cdot \left( y + x \right) + 2.000 \cdot \left( -1.000 \right) \cdot \sin \left( x \cdot y \right) \cdot \left( y + x \right) + 2.000 \cdot \left( -1.000 \right) \cdot \sin \left( x \cdot y \right) \cdot \left( y + x \right) + 2.000 \cdot \left( -1.000 \right) \cdot \sin \left( x \cdot y \right) \cdot \left( y + x \right) + 2.000 \cdot \left( -1.000 \right) \cdot \sin \left( x \cdot y \right) \cdot \left( y + x \right) + 2.000 \cdot \left( -1.000 \right) \cdot \left( -
         30 step: Finding a derivation of x
         If someone asked me that in the middle of the night, I wouldn't hesitate to say:
         (x)' = \dots = [\text{top secret}] = \dots =
    = 1.000
         31 step: Finding a derivation of y
         Even my two-aged sister knows that:
           (y)' = \dots = [\text{top secret}] = \dots =
         32 step: Finding a derivation of y + x
         I spend the hole of my life to find the answer and finally it's:
         (y+x)' = \dots = [\text{top secret}] = \dots =
    = 2.000
         33 step: Finding a derivation of y
         It's really easy to find:
           (y)' = \dots = [\text{top secret}] = \dots =
    = 1.000
         34 step: Finding a derivation of x
         It's really easy to find:
         (x)' = \dots = [\text{top secret}] = \dots =
    = 1.000
         35 step: Finding a derivation of x \cdot y
         It's simple as fuck:
         (x \cdot y)' = \dots = [\text{top secret}] = \dots =
    = y + x
         36 step: Finding a derivation of \cos(x \cdot y)
         It's simple as fuck:
         (\cos(x \cdot y))' = \dots = [\text{top secret}] = \dots =
    = (-1.000) \cdot \sin(x \cdot y) \cdot (y + x)
         37 step: Finding a derivation of \cos(x \cdot y) \cdot (y + x)
         A true prince must know that:
         (\cos(x \cdot y) \cdot (y + x))' = \dots = [\text{top secret}] = \dots =
    = (-1.000) \cdot \sin(x \cdot y) \cdot (y + x) \cdot (y + x) + 2.000 \cdot \cos(x \cdot y)
         38 step: Finding a derivation of x
         My roommate mumbled it in his sleep all night:
         (x)' = \dots = [\text{top secret}] = \dots =
    = 1.000
         39 step: Finding a derivation of y
         I was asked not to tell anyone that:
         (y)' = \dots = [\text{top secret}] = \dots =
    = 1.000
         40 step: Finding a derivation of y + x
         I spend the hole of my life to find the answer and finally it's:
         (y+x)' = \dots = [\text{top secret}] = \dots =
    = 2.000
         41 step: Finding a derivation of y
         It's really easy to find:
           (y)' = \dots = [\text{top secret}] = \dots =
    = 1.000
         42 step: Finding a derivation of x
           What if:
         (x)' = \dots = [\text{top secret}] = \dots =
 = 1.000
         43 step: Finding a derivation of x \cdot y
           While preparing for exams, I learned a lot of new things, for example:
         (x \cdot y)' = \dots = [\text{top secret}] = \dots =
    = y + x
         44 step: Finding a derivation of \cos(x \cdot y)
         Even my two-aged sister knows that:
         (\cos(x \cdot y))' = \dots = [\text{top secret}] = \dots =
    = (-1.000) \cdot \sin(x \cdot y) \cdot (y + x)
         45 step: Finding a derivation of \cos(x \cdot y) \cdot (y + x)
           What if:
         (\cos(x \cdot y) \cdot (y + x))' = \dots = [\text{top secret}] = \dots =
    = (-1.000) \cdot \sin(x \cdot y) \cdot (y + x) \cdot (y + x) + 2.000 \cdot \cos(x \cdot y)
         46 step: Finding a derivation of y
         It's simple as fuck:
         (y)' = \dots = [\text{top secret}] = \dots =
    = 1.000
         47 step: Finding a derivation of x
         My roommate mumbled it in his sleep all night:
           (x)' = \dots = [\text{top secret}] = \dots =
    = 1.000
         48 step: Finding a derivation of x \cdot y
         It's simple as fuck:
         (x \cdot y)' = \dots = [\text{top secret}] = \dots =
    = y + x
         49 step: Finding a derivation of \sin(x \cdot y)
         A true prince must know that:
         (\sin(x \cdot y))' = \dots = [\text{top secret}] = \dots =
    = \cos(x \cdot y) \cdot (y + x)
         50 step: Finding a derivation of 2.000
         My roommate mumbled it in his sleep all night:
           (2.000)' = \dots = [\text{top secret}] = \dots =
    = 0.000
         51 step: Finding a derivation of 2.000 \cdot \sin(x \cdot y)
         A true prince must know that:
         (2.000 \cdot \sin(x \cdot y))' = \dots = [\text{top secret}] = \dots =
    = 2.000 \cdot \cos(x \cdot y) \cdot (y + x)
         52 step: Finding a derivation of 2.000 \cdot \sin(x \cdot y) \cdot \cos(x \cdot y) \cdot (y + x)
         A true prince must know that:
           (2.000 \cdot \sin(x \cdot y) \cdot \cos(x \cdot y) \cdot (y + x))' = \dots = [\text{top secret}] = \dots =
    = 2.000 \cdot \cos{(x \cdot y)} \cdot (y + x) \cdot \cos{(x \cdot y)} \cdot (y + x) + ((-1.000) \cdot \sin{(x \cdot y)} \cdot (y + x) \cdot (y + x) + 2.000 \cdot \cos{(x \cdot y)}) \cdot 2.000 \cdot \sin{(x \cdot y)}
         53 step: Finding a derivation of 3.000
         If someone asked me that in the middle of the night, I wouldn't hesitate to say:
         (3.000)' = \dots = [\text{top secret}] = \dots =
    = 0.000
         54 step: Finding a derivation of 3.000 \cdot 2.000 \cdot \sin(x \cdot y) \cdot \cos(x \cdot y) \cdot (y + x)
         I spend the hole of my life to find the answer and finally it's:
         (3.000 \cdot 2.000 \cdot \sin(x \cdot y) \cdot \cos(x \cdot y) \cdot (y + x))' = \dots = [\text{top secret}] = \dots =
    = 3.000 \cdot (2.000 \cdot \cos{(x \cdot y)} \cdot (y + x) \cdot \cos{(x \cdot y)} \cdot (y + x) + ((-1.000) \cdot \sin{(x \cdot y)} \cdot (y + x) \cdot (y + x) + 2.000 \cdot \cos{(x \cdot y)}) \cdot 2.000 \cdot \sin{(x \cdot y)})
         55 step: Finding a derivation of 3.000 \cdot 2.000 \cdot \sin(x \cdot y) \cdot \cos(x \cdot y) \cdot (y + x) \cdot \cos(x \cdot y) \cdot (y + x)
         When I was child, my father always told me: "Remember, son:
           (3.000 \cdot 2.000 \cdot \sin(x \cdot y) \cdot \cos(x \cdot y) \cdot (y + x) \cdot \cos(x \cdot y) \cdot (y + x))' = \dots = [\text{top secret}] = \dots = [\text{top secret}]
    =3.000 \cdot (2.000 \cdot \cos{(x \cdot y)} \cdot (y + x) \cdot \cos{(x \cdot y)} \cdot (y + x) + ((-1.000) \cdot \sin{(x \cdot y)} \cdot (y + x) + ((-1.000) \cdot \sin{(x \cdot y)} \cdot (y + x) + ((-1.000) \cdot \sin{(x \cdot y)} \cdot (y + x) + ((-1.000) \cdot \sin{(x \cdot y)} \cdot (y + x) + ((-1.000) \cdot \sin{(x \cdot y)} \cdot (y + x) + ((-1.000) \cdot \sin{(x \cdot y)} \cdot (y + x) + ((-1.000) \cdot \sin{(x \cdot y)} \cdot (y + x) + ((-1.000) \cdot \sin{(x \cdot y)} \cdot (y + x) + ((-1.000) \cdot \sin{(x \cdot y)} \cdot (y + x) + ((-1.000) \cdot \sin{(x \cdot y)} \cdot (y + x) + ((-1.000) \cdot \sin{(x \cdot y)} \cdot (y + x) + ((-1.000) \cdot \sin{(x \cdot y)} \cdot (y + x) + ((-1.000) \cdot \sin{(x \cdot y)} \cdot (y + x) + ((-1.000) \cdot \sin{(x \cdot y)} \cdot (y + x) + ((-1.000) \cdot \sin{(x \cdot y)} \cdot (y + x) + ((-1.000) \cdot \sin{(x \cdot y)} \cdot (y + x) + ((-1.000) \cdot \sin{(x \cdot y)} \cdot (y + x) + ((-1.000) \cdot \sin{(x \cdot y)} \cdot (y + x) + ((-1.000) \cdot \sin{(x \cdot y)} \cdot (y + x) + ((-1.000) \cdot \sin{(x \cdot y)} \cdot (y + x) + ((-1.000) \cdot \sin{(x \cdot y)} \cdot (y + x) + ((-1.000) \cdot \sin{(x \cdot y)} \cdot (y + x) + ((-1.000) \cdot \sin{(x \cdot y)} \cdot (y + x) + ((-1.000) \cdot \sin{(x \cdot y)} \cdot (y + x) + ((-1.000) \cdot \sin{(x \cdot y)} \cdot (y + x) + ((-1.000) \cdot \sin{(x \cdot y)} \cdot (y + x) + ((-1.000) \cdot \sin{(x \cdot y)} \cdot (y + x) + ((-1.000) \cdot \sin{(x \cdot y)} \cdot (y + x) + ((-1.000) \cdot \sin{(x \cdot y)} \cdot (y + x) + ((-1.000) \cdot \sin{(x \cdot y)} \cdot (y + x) + ((-1.000) \cdot \sin{(x \cdot y)} \cdot (y + x) + ((-1.000) \cdot \sin{(x \cdot y)} \cdot (y + x) + ((-1.000) \cdot \sin{(x \cdot y)} \cdot (y + x) + ((-1.000) \cdot \sin{(x \cdot y)} \cdot (y + x) + ((-1.000) \cdot \sin{(x \cdot y)} \cdot (y + x) + ((-1.000) \cdot \sin{(x \cdot y)} \cdot (y + x) + ((-1.000) \cdot \sin{(x \cdot y)} \cdot (y + x) + ((-1.000) \cdot \sin{(x \cdot y)} \cdot (y + x) + ((-1.000) \cdot \sin{(x \cdot y)} \cdot (y + x) + ((-1.000) \cdot \sin{(x \cdot y)} \cdot (y + x) + ((-1.000) \cdot \sin{(x \cdot y)} \cdot (y + x) + ((-1.000) \cdot \sin{(x \cdot y)} \cdot (y + x) + ((-1.000) \cdot \sin{(x \cdot y)} \cdot (y + x) + ((-1.000) \cdot \sin{(x \cdot y)} \cdot (y + x) + ((-1.000) \cdot \sin{(x \cdot y)} \cdot (y + x) + ((-1.000) \cdot \sin{(x \cdot y)} \cdot (y + x) + ((-1.000) \cdot \sin{(x \cdot y)} \cdot (y + x) + ((-1.000) \cdot \sin{(x \cdot y)} \cdot (y + x) + ((-1.000) \cdot \sin{(x \cdot y)} \cdot (y + x) + ((-1.000) \cdot \sin{(x \cdot y)} \cdot (y + x) + ((-1.000) \cdot \sin{(x \cdot y)} \cdot (y + x) + ((-1.000) \cdot \sin{(x \cdot y)} \cdot (y + x) + ((-1.000) \cdot \sin{(x \cdot y)} \cdot (y + x) + ((-1.000) \cdot \sin{(x \cdot y)} \cdot (y + x) + ((-1.000) \cdot \sin{(x \cdot y)} \cdot (y + x) + ((-1.000) \cdot \sin{(x \cdot y)} \cdot (y + x) + ((-1.000) \cdot \sin{(x \cdot y

         In the point M_0(x_0, y_0) = (3.142, 2.000) it's value = 815.45956
    Finding partical derivations Partial derivation of the expression on the variable x:
             \frac{\partial f}{\partial x} = 3.000 \cdot (\sin(2.000 \cdot x))^{2.000} \cdot 2.000 \cdot \cos(2.000 \cdot x)
           In the point M_0(x_0, y_0) = (3.142, 2.000) it's value = 0.00000!!!
           Partial derivation of the expression on the variable y:
             \frac{\partial f}{\partial y} = 3.000 \cdot (\sin(3.142 \cdot y))^{2.000} \cdot 3.142 \cdot \cos(3.142 \cdot y)
           In the point M_0(x_0, y_0) = (3.142, 2.000) it's value = 0.00000!!!
    Finding full derivation Full derivation:
       \sqrt{\left(3.000 \cdot \left(\sin\left(2.000 \cdot x\right)\right)^{2.000} \cdot 2.000 \cdot \cos\left(2.000 \cdot x\right)\right)^{2.000} + \left(3.000 \cdot \left(\sin\left(3.142 \cdot y\right)\right)^{2.000} \cdot 3.142 \cdot \cos\left(3.142 \cdot y\right)\right)^{2.000}}
In the point M_0(x_0, y_0) = \left(3.142, 2.000\right) it's value = 0.00000 !!!
3 Exploration the expression as a function of the first variable
Now let's consider the expression as a function of x variable: f(x) = (\sin(2.000 \cdot x))^{3.000}
    Decomposing on Macloren's formula Maklorens formula for x \to x_0 = 3.142:
       f(x) = (-0.000) + 0.000 \cdot (x - 3.142) + (-0.002) \cdot (x - 3.142)^{2.000} + 8.000 \cdot (x - 3.142)^{3.000} + 0.007 \cdot (x - 3.142)^{4.000} + o((x - 3.142)^{4.000})
    Graphics Graph f(x) = (\sin(2.000 \cdot x))^{3.000} on the diapasone x \in [-10:10]:
                                                                                                                  ((sin((2.000)*(x)))**(3.000)) -
    Equations in the point Tangent equation in the point x_0 = 1.000:
                                                                                                                  ((\sin((2.000)*(x)))**(3.000))
                                                                                                       (((-2.064)*((x)-(1.000)))+(0.752))
                                                                                                         (((0.484)*((x)-(1.000)))+(0.752))
```

 $f(x) = (-2.064) \cdot (x - 1.000) + 0.752$ Normal equation in the point $x_0 = 1.000$: $f(x) = 0.484 \cdot (x - 1.000) + 0.752$
